Introduction

This User Guide introduces you to wireless service and all the features of your new phone. It’s divided into four sections:

- **Section 1:** Getting Started
- **Section 2:** Your Phone
- **Section 3:** Wireless Service
- **Section 4:** Safety & Warranty Information

Throughout this guide, you’ll find tips that highlight special shortcuts and timely reminders to help you make the most of your new phone and service. The Table of Contents and Index will also help you quickly locate specific information.

You’ll get the most out of your phone if you read each section. However, if you’d like to get right to a specific feature, simply locate that section in the Table of Contents and go directly to that page. Follow the instructions in that section, and you’ll be ready to use your phone in no time.

**WARNING**

Please refer to the **Important Safety Information** section on page 124 to learn about information that will help you safely use your phone. Failure to read and follow the Important Safety Information in this phone guide may result in serious bodily injury, death, or property damage.
Your Phone’s Menu

The following table outlines your phone’s menu structure (in list view). For more information about using your phone’s menus, see “Navigating Through the Menus” on page 15.

Setting Up Service

Setting up service on your new phone is quick and easy. This section walks you through the necessary steps to set up and turn on your phone, set up your voicemail, and contact your service provider for assistance with your wireless service.

Setting Up Your Phone

1. Install the battery.
   - Insert the battery into the opening in the back of the phone, making sure the connectors align. Gently press down to secure the battery.
   - Replace the battery cover and slide it upward until you hear a click.

2. Press END/ID to turn the phone on.
   - Your phone will turn on, search for service, and enter standby mode.

3. Make your first call.
   - Use your keypad to enter a phone number.
   - Press TALK .

Note
Your phone’s battery should have enough charge for the phone to turn on and find a signal, set up your voicemail, and make a call. You should fully charge your battery as soon as possible. See “Charging Your Battery” on page 14 for details.
Activating Your Phone

There are three basic scenarios for activating your new phone:

A. **You purchased your phone at a store.** It is probably activated and ready to use.

B. **You received your phone in the mail, and it is a new account or a new phone number.** Your phone is designed to activate automatically when you first turn it on. To confirm your activation, make a phone call.

C. **You received your phone in the mail and you are switching numbers from a previous phone to the new phone.** You need to contact your service provider to activate the number on your new phone. When you have finished, make a phone call to confirm your activation.

**Tip**

Do not press `END` while the phone is being activated. Pressing `END` cancels the activation process.

**Note**

If you are having difficulty with activation, contact your service provider.

---

Setting Up Your Voicemail

All unanswered calls to your phone are automatically transferred to your voicemail, even if your phone is in use or turned off. Therefore, you will want to set up your voicemail and personal greeting as soon as your phone is activated.

1. From standby mode, press and hold `1`.
2. Follow the system prompts to:
   - Create your passcode.
   - Record your name announcement.
   - Record your greeting.
   - Choose whether to activate One-Touch Message Access (a feature that lets you access messages simply by pressing and holding `1`, bypassing the need for you to enter your passcode).

**Note**

Voicemail Passcode

If you are concerned about unauthorized access to your voicemail account, it is recommended that you enable your voicemail passcode. (Do not activate One-Touch Message Access.)

For more information about using your voicemail, see "Using Voicemail" on page 102.
Getting Help

Directory Assistance

Call Directory Assistance from your phone and you’ll have access to a variety of services and information including residential, business, and government listings. There is a per-call charge to use Directory Assistance, and you will be billed for airtime.

To call Directory Assistance:

► Press 4 1 1 TALK.

Operator Services

Operator Services provides assistance when placing collect calls or when placing calls billed to a local telephone calling card or third party.

To access Operator Services:

► Press + 0 TALK.

For more information, please contact your wireless service provider.

4 Section 1A. Setting Up Service
Section 2A

Phone Basics

- Your Phone (page 6)
- Viewing the Display Screen (page 9)
- Features of Your Phone (page 11)
- Turning Your Phone On and Off (page 12)
- Using Your Phone’s Battery and Charger (page 12)
- Navigating Through the Menus (page 15)
- Displaying Your Phone Number (page 16)
- Making and Answering Calls (page 16)
- Entering Text (page 25)

Your phone is packed with features that simplify your life and expand your ability to stay connected to the people and information that are important to you. This section will guide you through the basic functions and calling features of your phone.
Key Functions

1. **Earpiece** lets you hear the caller and automated prompts.
2. **Main Screen** displays all the information needed to operate your phone, such as the call status, the Contacts list, the date and time, and the signal and battery strength.
3. **Softkeys** let you select softkey actions or menu items corresponding to the bottom right/left line on the main screen.
4. **Navigation Key** scrolls through menus quickly and easily. These keys can also be reassigned to create customized shortcuts.
5. **MENU/OK Key** lets you access the phone’s menus and select the highlighted choice when navigating through a menu.
6. **Camera Key** lets you access the Pictures menu and take pictures.
7. **TALK Key** allows you to place or receive calls, answer Call Waiting, use Three-Way Calling, or activate Voice Dial.
8. **SPEAKER Key** lets you place or receive calls in speakerphone mode or turn the speakerphone on and off during a call.
9. **Microphone** allows other callers to hear you clearly when you are speaking to them.
10. **Keypad** lets you enter numbers, letters, and characters, and navigate within menus. Press and hold keys 2–9. (See “Using Speed Dialing” on page 24.)
11. **END/POWER Key** lets you turn the phone on or off, end a call, or return to standby mode. While in the main menu, it returns the phone to standby mode and cancels your input.
12. **BACK Key** deletes characters from the display in text entry mode. When in a menu, pressing the BACK key returns you to the previous menu. This key also allows you to return to the previous menu in a data service session.
13. **Headset Jack** allows you to plug in an optional headset for convenient, hands-free conversations. **CAUTION!** Inserting an accessory into the incorrect jack may damage the phone.
14. **Camera Lens**, as part of the built-in camera, lets you take pictures.
15. **Speaker** lets you hear the different ringers and sounds. You can mute the ringer when receiving incoming calls by pressing or any of the side keys. The speaker also lets you hear the caller’s voice in speakerphone mode.

16. **LED Indicator** shows your phone’s connection and charging status at a glance.

17. **Outer Screen** lets you monitor the phone’s status and see who’s calling without opening the phone.

18. **Micro-USB Connector** allows you to connect a phone charger or other accessories to your phone. **CAUTION!** Inserting an accessory into the incorrect connector may damage the phone.

19. **Volume Key** allows you to adjust the ringer volume in standby mode (with the phone open) or adjust the voice volume during a call. The volume key can also be used to scroll up or down to navigate through the different menu options. To mute the ringer during an incoming call, press up or down. Press and hold to redial with the phone closed.

20. **Side Camera Key** lets you access the camera mode and take pictures.

21. **Internal Antenna** facilitates reception and transmission. To maximize call performance, do not obstruct the internal antenna area. (See page 16.)
Viewing the Display Screen

Your phone's display screen provides a wealth of information about your phone's status and options. This list identifies the symbols you'll see on your phone's display screen:

- **indicates your current signal strength. The more lines you have, the stronger your signal.**
- **indicates you are “roaming” off the home network.**
- **indicates your phone cannot find a signal.**
- **indicates the call is on hold.**
- **indicates that a call is in progress.**
- **indicates data service access is active.**
- **indicates data service access is dormant.**
- **indicates data service access is disabled.**
- **indicates you have missed voice calls.**
- **indicates you have scheduled events or call alarms.**
- **indicates you have alarm clock or countdown notifications.**
- **indicates you have new SMS Text messages.**
- **indicates you have new picture messages.**
- **indicates you have new voicemail messages.**
- **indicates you have urgent messages.**
- **indicates you have two or more different types of missed calls, scheduled events, call alarms, or alarm clock or countdown notifications.**
- **indicates the Bluetooth feature is enabled (blue icon).**
- **indicates your phone is discoverable by another Bluetooth device.**
- **indicates your phone is connected to a Bluetooth device (green icon).**
- **indicates your phone is communicating with a Bluetooth device.**
- **indicates access to a secure site.**

To view a list of your phone's icons and descriptions, from the main menu select **Settings > Phone Info > Icon Glossary.**
indicates the level of your battery charge. The more black you see, the more power you have left. (The icon is animated while the battery is charging.)
indicates your battery is charging in “Power Off” state.
indicates volume level 1 to 8 and vibrate feature are set.
indicates 1-beep feature is set.
indicates 1-beep and vibrate feature are set.
indicates all ringer settings are off.
indicates all ringer settings are off and the vibrate feature is set.
indicates all the sound settings except applications volume are off and the vibrate feature is set.
indicates all the sound settings are off.
indicates the Location feature of your phone is enabled.
indicates the Location feature of your phone is disabled.
indicates you have a new voice message when Screen Call is activated.
indicates the Screen Call Auto setting is on.
indicates your phone is in TTY mode.
indicates the alarm clock or countdown setting is on.
indicates the speakerphone mode is set to on.
indicates a call is in progress using the Bluetooth device.
indicates the car kit device is set to on.
indicates the wired headset device is set to on.
Features of Your Phone

The KATANA® LX by SANYO is lightweight, easy-to-use, and reliable, and it also offers many features and service options. The list previews some of those features and provides page numbers where you can find out more:

- Digital dual-band capability allows you to make and receive calls while on the home network and to roam on other 1900 and 800 MHz digital networks where roaming agreements have been implemented (page 53).

- SMS Text Messaging (page 107) provides quick and convenient messaging capabilities.

- Your Contacts allows you to store up to 300 entries, with up to seven phone numbers per entry (page 61).

- The built-in calendar offers several personal information management features to help you manage your busy lifestyle (page 70).

- The Location feature works in connection with available location-based services (page 38).

- T9 Text Input lets you quickly type messages with one keypress per letter (page 26).

- Speed dial lets you dial phone numbers with one keypress or two keypresses (page 24).

- The built-in camera allows you to take full-color digital pictures, view your pictures using the phone’s display, and instantly send them to family and friends using picture messaging (page 85).

- Automatic Speech Recognition (ASR) allows you to place calls or open applications by speaking to your phone (page 78).

- Games, ringers, screen savers, and other applications can be downloaded to make your phone as unique as you are (page 117). Additional charges may apply.

- The built-in Bluetooth technology allows you to connect wirelessly to a number of Bluetooth devices to share information more easily than ever before (page 95).
Turning Your Phone On and Off

Turning Your Phone On

Press END/0.

Once your phone is on, it may display “Looking for service.” When your phone finds a signal, it automatically enters standby mode. At this point, you are ready to begin making and receiving calls.

If your phone is unable to find a signal after 15 minutes of searching, a Power Save feature is automatically activated. When a signal is found, your phone automatically returns to standby mode.

In Power Save mode, your phone searches for a signal periodically without your intervention. You can also initiate a search for service by pressing any key (when your phone is turned on).

Tip
The Power Save feature conserves your battery power when you are in an area where there is no signal.

Turning Your Phone Off

Press and hold END/0 for two seconds until you see the powering down animation on the display screen.

Your screen remains blank while your phone is off (unless the battery is charging).

Using Your Phone’s Battery and Charger

WARNING
Use only manufacturer-approved batteries and chargers with your phone. The failure to use a manufacturer-approved battery and charger may increase the risk that your phone will overheat, catch fire, or explode, resulting in serious bodily injury, death, or property damage.
Battery Capacity

Your phone is equipped with a Lithium Ion (Li-Ion) battery. It allows you to recharge your battery before it is fully drained. The battery provides up to 4.8 hours of continuous digital talk time.

When there are approximately two minutes of talk time left, the phone sounds an audible alert and then turns off.

Installing the Battery

1. Insert the battery into the opening in the back of the phone, making sure the connectors align (1). Gently press down to secure the battery (2).

2. Replace the battery cover and slide it upward until you hear a click (3).

Removing the Battery

1. Make sure the power is off so that you don’t lose any stored numbers or messages.

2. Press the battery release latch (1) and slide the battery cover downward and remove it (2).

3. Lift up the battery and remove it from the phone (3).

WARNING Do not handle a damaged or leaking Li-Ion battery as you can be burned.

Note Long backlight settings, searching for service, vibrate mode, browser use, and other variables may reduce the battery’s talk and standby times.

Tip Watch your phone’s battery level indicator and charge the battery before it runs out of power.
**Charging Your Battery**

Charge your battery as soon as possible so you can begin using your phone.

Keeping track of your battery's charge is important. If your battery level becomes too low, your phone automatically turns off, and you will lose any information you were just working on. For a quick check of your battery level, glance at the battery charge indicator located in the upper-right corner of your phone’s display screen. If the battery charge is getting too low, the battery icon ( ) appears and the phone displays a warning message.

Always use a manufacturer-approved desktop charger, travel charger, or vehicle power adapter to charge your battery.

**Using the Phone Charger**

1. Plug the phone charger into a wall outlet.
2. Open the micro-USB connector cover located on the upper left side of your phone.
3. Plug the other end of the phone charger into the micro USB connector.
   - A red indicator light means the battery is charging.
   - A green indicator light means charging is completed.

With the manufacturer-approved Li-Ion battery, you can recharge the battery before it becomes completely run down.

**Note**

You can also charge your phone's battery with a USB cable (not included). Simply plug one end of the USB cable into your phone and the other end into a free USB port on your desktop or laptop computer.

If your battery is completely run down, it cannot be charged via the USB cable.
Navigating Through the Menus

The navigation key on your phone lets you scroll through menus quickly and easily. The scroll bar at the right of the menu keeps track of your position in the menu at all times.

To navigate through a menu, simply press the navigation key up or down. If you are in a first-level menu such as Settings, you may also navigate to the next or previous first-level menu by pressing the navigation key right or left.

For a diagram of your phone’s menu, please see “Your Phone’s Menu” on page ii.

Selecting Menu Items

As you navigate through the menu, menu options are highlighted. Select any item by highlighting it and pressing . In list view, select any numbered option by pressing the corresponding number on the phone’s keypad.

For example, if you want to display your volume settings:

1. Press to access the main menu.
2. Select Settings by pressing (in List view) or by highlighting it and pressing .
3. Select Sounds by pressing or by highlighting it and pressing .
4. Select Volume by pressing or by highlighting it and pressing .
5. Select Ringer by pressing or by highlighting it and pressing .

Note For the purposes of this guide, the above steps condense into “Press MENU > Settings > Sounds > Volume > Ringer.”

Backing Up Within a Menu

To go to the previous menu:

► Press BACK.

To return to standby mode:

► Press END/ID.
Displaying Your Phone Number

Press \texttt{Option} > \texttt{Settings} > \texttt{Phone Info} > \texttt{Phone#/UserID}.

(Your phone number and other information about your phone and account will be displayed.)

Tip

You can also display your phone number by pressing \texttt{MENU} > \texttt{Settings} > \texttt{More...} > \texttt{Contacts} > \texttt{My Name Card}. To send your contact information using Bluetooth, press \texttt{Options} (right softkey) > \texttt{Send Card}.

Making and Answering Calls

Holding Your Phone

To maximize performance, do not obstruct the internal antenna area.
Making Calls

Placing a call from your wireless phone is as easy as making a call from any landline phone. Enter the number, press TALK, and you’re on your way to clear calls.

To make a call using your keypad:

1. Make sure your phone is on.
2. Enter a phone number from standby mode. (If you make a mistake while dialing, press BACK to erase the numbers.)
3. Press TALK or SPEAKER. (To make a call when you are roaming and Call Guard is enabled, see “Using Call Guard” on page 55.)
4. Press END or close the phone when you are finished.

Tip

To redial your most recent call (outgoing, incoming, or missed), press TALK twice.

When making calls off the home network, always dial using 11 digits (1 + area code + phone number).

You can also place calls from your phone by using Automatic Speech Recognition (ASR, page 79), speed dialing (page 24), and by using your History listings (page 59).

Dialing Options

When you enter numbers in standby mode, press Options (right softkey) to display the following dialing options.

- **Abbrev. Dial** to place a call using the abbreviated dialing feature. (See “Using Abbreviated Dialing” on page 23.)
- **Save** to save the phone number in your Contacts. (See “Saving a Phone Number” on page 22.)
- **Hard Pause** to insert a hard pause. (See “Dialing and Saving Phone Numbers With Pauses” on page 22.)
- **T 2-Sec. Pause** to insert a two-second pause. (See “Dialing and Saving Phone Numbers With Pauses” on page 22.)
Answering Calls

1. Make sure your phone is on. (If your phone is off, incoming calls go to voicemail.)

2. Press TALK or SPEAKER to answer an incoming call. (Depending on your phone’s settings, you may also answer incoming calls by opening the phone or by pressing any number key. (See “Call Answer Mode” on page 43.)

Your phone notifies you of incoming calls in the following ways:

- The phone rings or vibrates.
- The indicator light flashes.
- The backlight illuminates.
- The screen displays an incoming call message.

If the incoming call is from a number stored in your Contacts, the entry’s name is displayed. The caller’s phone number may also be displayed, if available.

When receiving a call, the following options are also displayed by pressing Options (right softkey):

- **Call Guard** to answer the call when you are in roaming mode. (See “Using Call Guard” on page 55.)
- **Answer** or **Answer:Speaker** to answer the call.
- **Select Audio** to switch the call to a device (if available).
- **Answer on Hold** to put the call on hold.
- **Screen Call** to answer the call by using a prerecorded announcement. (See “Setting Up Screen Call” on page 83.)
- **Quiet Ringer** to mute the ringer (if available).
- **Ignore with Text** to ignore the call and send a text message to the caller (if available).
Answering a Roam Call With Call Guard Enabled

Call Guard is an option that helps you manage your roaming charges when making or receiving calls while outside the home network. Please see “Roaming” on page 53 for more information about roaming.

- To answer the call, press TALK, and then press 1 to proceed while the pop-up message is displayed. (See “Using Call Guard” on page 55 for additional information.)

Note When your phone is off, calls go directly to voicemail.

Ending a Call

- Close the phone or press END/0.

Missed Call Notification

When an incoming call is not answered, the Missed Call log is displayed on your screen.

To display the Missed Call entry from the notification screen:

- Select the entry and press MENU. (Select an option to continue.)

Tip If you have two or more notifications, the Missed Alerts list will appear.

To display a Missed Call entry from standby mode:

1. Press Menu > Missed Alerts.
2. Select the entry you wish to view and press MENU.

Calling Emergency Numbers

You can place calls to 911 (press 9 1 1 TALK), even if your phone is locked or your account is restricted.

During an emergency call, press Options (right softkey) to display your options.

- Speaker On to activate the speakerphone mode. (If you are already in speakerphone mode, the option is displayed as Speaker Off to deactivate.)
- Unlock MyPhone to unlock your phone (appears only if the phone is locked).

Tip Press My Phone (left softkey) to display your phone number during an emergency call.
Emergency mode options

If you end the emergency call by pressing \( \text{END/\O} \), your phone enters the emergency mode.

1. Press \( \text{END/\O} \) to end a 911 call.

2. Press Options (right softkey).
   - Call 911 to call 911.
   - Call 911:Spkr. to call 911 in speakerphone mode.
   - Exit Emergency to exit Emergency mode.

3. Select an option and press \( \text{SEND} \).

Enhanced 911 (E911) Information

This phone features an embedded Global Positioning System (GPS) chip necessary for utilizing E911 emergency location services where available.

When you place an emergency 911 call, the GPS feature of your phone seeks information to calculate your approximate location. Depending on several variables, including availability and access to satellite signals, it may take up to 30 seconds or more to determine and report your approximate location.

IMPORTANT

Always report your location to the 911 operator when placing an emergency call. Some designated emergency call takers, known as Public Safety Answering Points (PSAPs) may not be equipped to receive GPS location information from your phone.

Note

When you are in Emergency mode, you can exit only from the Options menu.
In-Call Options

Pressing **Options** (right softkey) during a call displays a list of available in-call features. The following options are available through the Options menu:

- **Three-Way Call** to call a third party.
- **Main Menu** to display the phone's main menu.
- **Save** to save the currently used phone number in your Contacts. **Contact Details** appears if the number is already in your Contacts.
- **Contacts** to display your Contacts list.
- **Call Memo Rec.** to record the phone's conversation.
- **Phone Info** to access the Phone Info menu.
- **Transfer Audio** to switch the call to an external device (if applicable).

**Tip**
To return to the in-call screen from the main menu, etc., press **TALK**.

During a call, both the left softkey and the side camera key function as a mute key. Press either one to mute the phone’s microphone for privacy. Press again to unmute the phone.

**Note**
You can turn the speakerphone on or off by pressing the **SPEAKER** during a phone call.

End-of-Call Options

Once you have finished your call, the phone will display the Recent History. From the Recent History, you can view the date and time of the call, the phone number (if available), the entry name (if the number is already in your Contacts), and the duration of the call.

- Press **Options** (right softkey) to display the Recent History options. (See “History Menu Options” on page 58 for details.)
- Press **Send Msg** (left softkey) to send a text or picture message to the entry in the Recent History.

**WARNING**
Because of higher volume levels, do not place the phone near your ear during speakerphone use.

**Note**
Some options may not be displayed for calls identified as No Caller ID or Restricted.
Saving a Phone Number

Your phone can store up to 300 Contacts entries. Contacts can store up to a total of 500 phone numbers, and each Contacts entry's name can contain up to 64 characters. Your phone automatically sorts the Contacts entries alphabetically. (For more information, see “Contacts” on page 61.)

1. Enter a phone number and press Options (right softkey) > Save.
2. Select New Entry or Existing Entry and press MENU.
3. If New Entry was selected, select a phone type, and then use the keypad to enter the new entry name and press MENU.

   – or –

   If Existing Entry was selected, select an existing entry to which you want to save the number, and then select a phone type and press MENU.
4. Press Done (left softkey).

Finding a Phone Number

You can search Contacts entries for phone numbers that contain a specific string of numbers.

1. Enter the last three or more digits of the number in standby mode. (The more numbers you enter, the more specific the search becomes.)
2. All Contacts entries matching the entered numbers will be displayed. Highlight the entry and press TALK to dial the number.

Dialing and Saving Phone Numbers With Pauses

You can dial or save phone numbers with pauses for use with automated systems, such as voicemail or credit card billing numbers.

There are two types of pauses available on your phone:

- **Hard Pause** sends the next set of numbers when you press TALK.
- **2-Sec. Pause** automatically sends the next set of numbers after two seconds.

**Note** You can have multiple pauses in a phone number and combine two-second and hard pauses.
To dial or save phone numbers with pauses:

1. Enter the phone number.
2. Press **Options** (right softkey) > **Hard Pause** or **2-Sec. Pause**.
3. Enter additional numbers.
4. Press **Talk** to dial the number.
   - or -
   Press **Options** (right softkey) > **Save** to save the number in your Contacts.

**Note** When dialing a number with a hard pause, press **Talk** to send the next set of numbers.

---

Using Abbreviated Dialing

Abbreviated Dialing is similar to speed dialing. You can use either of the following abbreviated dialing features.

- **Contacts Match** to retrieve any number saved in your Contacts by entering only the last three to six digits of the number. (See “To activate the Contacts Match feature” on page 43)
- **Prepend** to prepend the first five or six digits (for example, the area code and prefix) to any four or five digits you enter. (See “To activate the Prepend feature” on page 43.)

To place a call using Contacts Match Abbreviated Dialing:

1. Enter the last three to six digits of a Contacts entry’s phone number.
2. Press **Talk** to call the displayed number.

To place a call using Prepend Abbreviated Dialing:

1. Enter the last four or five digits of the number.
2. Press **Talk**.

**Note** If the Abbrev. Dial list is displayed, select the name or the phone number you want to call from the list, and then press **Talk** to place a call.
**Plus (+) Code Dialing**

When placing international calls, use Plus Code Dialing to automatically enter the international access code for your location (for example, 011 for international calls made from the United States). This feature is subject to network availability.

1. Press and hold $+$ until a “+” is displayed on your phone screen.

2. Dial the country code and phone number you’re calling, and press $\text{TALK}$. (The access code for international dialing will automatically be dialed, followed by the country code and phone number.)

**Dialing From the Contacts List**

1. Press Contacts (right softkey).

2. Highlight the entry you want to call and press $\text{TALK}$ to dial the entry’s default phone number.
   - or –
   To dial another number from the entry, select the name and press $\text{SELECT}$, and then select the number you wish to call and press $\text{TALK}$.

**Using Speed Dialing**

You can store up to 98 numbers in your phone’s speed dial memory to make contacting friends and family as easy as pressing a key or two. With this feature, you can dial speed dial entries using one keypress for locations 2–9 or two keypresses for locations 10–99. (For information on setting up speed dial numbers, see “Assigning Speed Dial Numbers” on page 65.)

From standby mode, press and hold the appropriate key for approximately two seconds. The display confirms that the number has been dialed when it shows “Connecting...”. To use Two-Touch Dialing (10–99), press the first digit, then press and hold the second digit.

**Note**

Speed dialing may not be available when you are roaming; when you are roaming off the home network, you must always dial using 11 digits (1 + area code + number).
Entering Text

Selecting a Text Input Mode

Your phone provides convenient ways to enter words, letters, numbers, and symbols whenever you are prompted to enter text (for example, when adding a Contacts entry or when using SMS Text Messaging).

1. From a screen where you can enter text, press Mode (right softkey) to change the text input mode.

2. Select one of the following options:

- **T9 Word** to enter text using a predictive text system that reduces the number of keypresses required while entering a word. (See page 26.)
- **Alphabet** to enter characters by using the Alphabet mode. (See page 27.)
- **SYMBOL** to enter symbols. (See page 28.)
- **SMILEYS** to enter smile icons. (See page 28.)
- **Emoticons** to enter “emoticons.” (See page 28.)
- **Web Shortcut** to enter Web shortcuts (for example, www., http://, or .com).
- **Preset Msgs** to enter preset messages. (See pages 28 and 108.)
- **Recent Msgs** to enter messages used recently.
- **Paste List** to paste copied or cut text (if applicable).
- **From To Do** to use words you added in your Calendar as To Do.
- **NUMBER** to enter numbers.
- **Signature** to enter your signature. (See page 39.)
- **Select Lang.** to select the language (English or Spanish).
- **Delete All** to delete all text (if applicable).
- **Select Text** to select stored text for copying or cutting (if applicable).
- **Add Word** to store words that you frequently use. (See page 26.)
- **Text Options** to display the Text Entry settings menu. (See page 29.)

**Note** The menus displayed vary according to the entry field. If you see triangles on the right of the menu, press the right and left navigation keys to switch between related menus.
Entering Characters Using T9 Text Input

T9 Text Input lets you enter text with just one keypress per letter.

T9 Text Input uses an intuitive word database to analyze the letters you enter and create a suitable word. (The word may change as you type.)

1. From a screen where you can enter text, press Mode (right softkey) > T9 Word.

2. Press the corresponding key once for each letter of the word. For example, to enter the word “Bill,” press abc 2 (Alphabet Mode). If you make a mistake, press BACK to erase a single character. Press and hold BACK to erase an entire word.

3. Use your navigation key to scroll through the list (when applicable), and then select a word.

4. To accept a word and insert a space, press space .

Adding a Word to the T9 Database

If a word you want to enter is not displayed as an option when you are using T9 Text Input, you can add it to the T9 database.

1. Press Mode (right softkey) > Add Word.

2. Enter the word using Alphabet Mode and press Save (left softkey). (See “Entering Characters Using Alphabet Mode” on page 27.) The word will appear as an option the next time you scroll through options during T9 Text Input.

To edit or delete the words you have added:

1. Press Mode (right softkey) > Text Options > My Words.

- or -

From standby mode, press > Settings > Text Entry > My Words.

2. Highlight a word and press Options (right softkey).

3. Select an option and press .

- Edit to edit a word in My Words.

- Delete to delete a word in My Words.

Tip

When entering text, press the * (SHIFT) to change the capitalization style:

ABC > abc > Abc (Alphabet Mode)
T9W > t9w > T9w (T9 Text Input Mode).

26 Section 2A. Phone Basics
Customizing the T9 Settings

1. Press > Settings > Text Entry > T9 Settings.
   – or –
   From a screen where you can enter text, press Mode (right softkey) > Text Options > T9 Settings.
2. Select an option and press .
   - **Word Predict** to automatically display the word that may follow the current text input.
   - **Word Complete** to show the completed words that match the keys you have entered without entering the whole word.
   - **Word Scan** to allow T9 text input to recognize words by searching Contacts and messages.
   - **Word List** to display the word list.
   - **Show aft entr** to select when (after 1–3 digits) to display the word list. The word list will be displayed based on the number of digits you selected.
   - **Show aft wait** to select how many seconds the phone should wait to display the word list.

For more information about T9 Text Input, visit the Nuance Web site at [www.nuance.com/t9/textinput/](http://www.nuance.com/t9/textinput/).

Entering Characters Using Alphabet Mode

1. From a screen where you can enter text, press Mode (right softkey) > Alphabet .
2. Press the corresponding key repeatedly until the correct letter appears. For example, to enter the word “Bill,” press twice, three times, three times, and three times again. If you make a mistake, press BACK to erase a single character. Press and hold BACK to erase an entire word.

By default, the first letter of an entry is capitalized and the following letters are lowercased. After a character is entered, the cursor automatically advances to the next space after two seconds or when you enter a character on a different key.
Characters scroll in the following order:

<table>
<thead>
<tr>
<th>Key</th>
<th>English Sequence</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Upper Case</td>
</tr>
<tr>
<td>#</td>
<td>. , @ 1 ? ! * # /</td>
</tr>
<tr>
<td>ABC</td>
<td>A B C 2</td>
</tr>
<tr>
<td>DEF</td>
<td>D E F 3</td>
</tr>
<tr>
<td>GHI</td>
<td>G H I 4</td>

<td>One-character-shifted</td>
</tr>
</tbody>
</table>

Entering Symbols, Smileys, Emoticons, and Preset Messages

Special text entry sets can help speed your messaging and Web browsing. These sets, including symbols, smileys, emoticons, and preset messages are all accessed the same way.

1. From a screen where you can enter text, press **Mode** (right softkey).
2. Select **SYMBOL, SMILEYS, Emoticons**, or **Preset Msgs**.
3. Use your keypad or navigation key to select the desired text or symbol and press **OK**.
Setting Text Entry Options

1. Press > Settings > Text Entry.
2. Select an option and press .
   - **Auto-Capital** to turn auto-capitalization on or off.
   - **Auto-Space** to turn auto-spacing on or off after T9 words you enter.
   - **Inpt Language** to select the language (English or Spanish).
   - **My Words** to add or edit a word in the T9 database (see page 26).
   - **T9 Settings** to customize the T9 settings (see page 27).
   - **Default Input** to select T9 word, Alphabet, or Retain Mode for the initial entry mode.
   - **Add Word** to store words that you use frequently (see page 26).
   - **Auto-Complete** to automatically display words that may follow the current text input.
   - **Help** to see the T9 instructions page.
You can customize your phone to sound, look, and operate just the way you want it to. This section describes how to change your phone’s settings to best suit your needs. Take a few moments to review these options and to adjust or add settings that are right for you.

Sound Settings

Ringer Types
Ringer types help you identify incoming calls or messages. You can assign ringer types to individual Contacts entries, types of calls, and types of messages.

Selecting Ringer Types for Incoming Calls
1. Press \( \text{Menu} \) > Settings > Sounds > Ringer Type > Incoming Calls.
2. Select Default Ringer, Contact Entries, or Unknown #s.
   - If you select Contact Entries, select All Contacts or One Contact.
3. Select an option and press \( \text{Menu} \).
4. Use your navigation key to scroll through the available ringers. A sample ringer will sound as you highlight each option.
5. Press \( \text{Menu} \) to assign a ringer.
Selecting Ringer Types for Messages
1. Press > Settings > Sounds > Ringer Type > Messaging.
2. Select Text Message, Picture Msg, or Voicemail.
3. Select an option and press .
4. Use your navigation key to scroll through the available ringers. A sample ringer will sound as you highlight each option.
5. Press to assign a ringer.

Selecting Ringer Types for Alarms or Scheduled Events
1. Press > Settings > Sounds > Ringer Type.
2. Select Alarm or Schedule.
3. Select an option and press .
4. Use your navigation key to scroll through the available ringers.
5. Press to assign a ringer.

Selecting Ringer Types for Power On or Power Off Alerts
1. Press > Settings > Sounds > Ringer Type.
2. Select Power On or Power Off.
3. Select an option and press .
4. Use your navigation key to scroll through the available ringers.
5. Press to assign a tone.

Selecting Vibrate Types
With this feature, you can select vibrate types for incoming calls, messages, alarms, and scheduled events.
1. Press > Settings > Sounds > Vibrate Type.
2. Select Incoming Calls, Messaging, Alarm, or Schedule.
   - Incoming Calls: select Default Vibrate or Unknown #s.
   - Messaging: select Text Message, Picture Msg, or Voicemail.
3. Select a vibrate type and press .
Selecting a Key Tone

Your phone offers a number of options for selecting the audible tones accompanying a keypress.

1. Press > Settings > Sounds > Keytones.
2. Select an option and press .
   - Tone Length to select a key tone length. (Longer tone lengths may be better for tone recognition when dialing voicemail or other automated systems.)
   - Tone Volume to select a keypress volume level.
   - Tone Type to select the sound of a keypress.

Setting Up Voice Guide

Voice Guide activates both voice prompt and keypress echo functions. This feature allows you to hear voice prompts when using Automatic Speech Recognition (ASR), Voice Memo, Screen Call, etc., and to hear spoken numbers as you press the keypad.

1. Press > Settings > Sounds > Voice Guide.
2. Select On or Off.

Note
- The default setting is Off.
- When the ringer volume is set to Silence All or Vibrate All, Voice Guide will not work.
- The keypress echo function is available when you are in standby mode.

Adjusting the Phone’s Volume Settings

Adjust your phone’s volume settings to suit your needs and your environment.

1. Press > Settings > Sounds > Volume.
2. Select Ringer, Earpiece, Headset, Speakerphone, Applications, or Start Up/Power Off.
3. Select a volume level and press Done (left softkey).

Tip
- You can choose a volume level from standby mode (or the earpiece volume during a call) by using the volume key on the left side of your phone.
Adjusting the Alert Volume

You can set the alert volume separately from the ringer volume setting.

1. Press \( \Rightarrow \) > Settings > Sounds > Volume > Advanced....
2. Select Alarms, Text Message, Picture Msg, or Voicemail.
3. Using the navigation key, select Separate Vol.
4. Press the navigation key right or left to choose a volume level and press Done (left softkey).

Tip You can make the ringer vibrate at any volume level by checking Always Vibrate.

Alert Notification

Set your phone to alert you with an audible tone when you change service areas, a call has been connected, there are messages, or your network signal is fading as well as once a minute during a voice call.

1. Press \( \Rightarrow \) > Settings > Sounds > Alerts.
2. Select Beep Each Minute, Out of Service, Connect, Signal Fade/Call Drop, or Messaging.
3. Use your navigation key to select a setting and press \( \Rightarrow \).

Silence All

The Silence All option allows you to mute all sounds without turning your phone off.

To activate Silence All:

- With the phone open, press the volume key down repeatedly in standby mode. (The screen will display “Silence All.”)

To deactivate Silence All:

- With the phone open, press the volume key up repeatedly to select a volume level.
Display Settings

Changing the Screen Saver
Select the option of displaying a screen saver while in standby mode.

1. Press \( \text{Menu} \) > Settings > Display > Main Screen > Screensaver.
2. Select an option and press \( \text{Menu} \).
3. Select a screen saver and press \( \text{Menu} \).

Changing the Display Screen Animation
Choose what you see on the display screen during various phone functions.

1. Press \( \text{Menu} \) > Settings > Display > Main Screen or Outer Screen > Animation.
   - Main Screen: Select Outgoing Calls or Service Search.
2. Select an option and press \( \text{Menu} \).
3. Select an animation display and press \( \text{Menu} \).

Changing the Backlight Time Length
Select how long the display screen and keypad remain backlit after any keypress is made.

To change the Backlight setting:
1. Press \( \text{Menu} \) > Settings > Display > Main Screen > Backlight.
2. Select an option and press \( \text{Menu} \).

To change the Keypad Light setting:
1. Press \( \text{Menu} \) > Settings > Display > Keypad Light.
2. Select Always Off or a preset length of time.

Note: Long backlight settings affect the battery’s talk and standby times.
Changing the Background

Customize your phone display’s appearance by selecting a color scheme to reflect your personality.

1. Press > Settings > Display > Main Screen > Background.
2. Select a background and press .

Changing the Input Font Size

Adjust the font size when entering text (for example, when adding a Contacts entry).

1. Press > Settings > Display > Main Screen > Input Font.
   - or –
   Press > Settings > More... > Accessibility > Input Font.
2. Select Phone#s, Messaging, or Others.
3. Select an input font size and press .

Changing the Standby Mode Display

Select from among a variety of items to be displayed in standby mode.

1. Press > Settings > Display > Main Screen or Outer Screen.
2. Select Foreground > Clock/Calendar.
3. Select a display option and press .
4. Press OK (left softkey) to apply the display setting.

Changing the Text Greeting

The text greeting is displayed on your phone’s screen in standby mode. You may enter your own custom greeting or choose the preset greeting.

To display or change your greeting:

1. Press > Settings > Display > Main Screen > Foreground > Greeting > Default or Custom.
2. If you select Custom, enter a custom greeting using your keypad and press .
**Sleep Mode**

This feature helps conserve your battery power by restricting the display.

1. Press > Settings > Display.
2. Select Main Screen or Outer Screen.
3. Select Sleep Mode.
4. Select a time interval before the phone goes into sleep mode and press . (Select Off to deactivate this feature [Main Screen only].)

**Changing the Contrast**

Adjust your screen’s contrast (brightness) to suit your surroundings.

1. Press > Settings > Display > Contrast.
2. Select an option and press .

**Changing the Text Font Size**

Adjust the main screen font size when viewing messages or browsing on the Web as well as the outer screen font size when viewing names and phone numbers.

1. Press > Settings > Display > Font Size.
   
   – or –

2. Select an option and press .
   
   - Main Screen to select Messaging or Browser.
   - Outer Screen to select Name/Phone#s.
3. Select a font size and press .

**Tip**

You can press Preview (right softkey) and select a font size by pressing the navigation key right or left.
Display Language
Choose to display your phone’s onscreen menus in English or in Spanish.
1. Press \[ > Settings > Display > Language.\]
2. Select English or Español.

Power Save Mode
This feature helps conserve your battery power.
1. Press \[ > Settings > Display > Power Save Mode.\]
2. A message appears. Press OK (left softkey) to continue.
3. Select On. (Select Off to deactivate this feature.)

Setting Return to Idle Mode
Select how to return to Idle mode.
1. Press \[ > Settings > Display > Return to Idle.\]
2. A message appears. Press OK (left softkey) to continue.
3. Select Automatically or End Key.
   - Automatically to return to Idle mode (standby mode or signal search mode) automatically when no key is pressed for 30 seconds.
   - End Key to return to Idle mode by pressing END/0.

Note: The End Key setting affects the battery’s talk and standby times.

Changing the Phone’s Menu Style
Choose how the menu is displayed on the screen.
1. Press \[ to access the main menu, and then press Options (right softkey) > Change View.
2. Select a menu style (Grid View or List View) and press OK.
Location Settings

Your phone is equipped with a Location feature for use in connection with location-based services.

The Location feature allows the network to detect your position. Turning Location off will hide your location from everyone except 911.

**Note** Turning Location on will allow the network to detect your position using GPS technology, making some applications and services easier to use. Turning Location off will disable the GPS location function for all purposes except 911, but will not hide your general location based on the cell site serving your call. No application or service may use your location without your request or permission. GPS-enhanced 911 is not available in all areas.

1. Press \[\text{Menu}\] > Settings > More... > Location. (The Location disclaimer will be displayed.)
2. Read the disclaimer and press OK (left softkey).
3. Select On or Off.

When the Location feature is on, your phone’s standby screen will display the \[\text{Location}\] icon. When Location is turned off, the \[\text{Location}\] icon will be displayed.

Messaging Settings

Staying connected to your friends and family has never been easier. With your phone’s advanced messaging capabilities, you can send and receive many different kinds of text messages without placing a voice call.

Messaging settings make text messaging even faster and easier by letting you decide how you would like to be notified of new messages, create a signature with each sent message, and create your own preset messages.

**Setting Message Notification**

When you receive a message, your phone notifies you by displaying an icon on your display screen. You can also choose to be notified with a message notification on your display screen.

1. Press \[\text{Menu}\] > Settings > Messaging > Notification.
2. Select Msgs and Icon or Icon Only.

**Tip** To access the Messaging settings menu, you can also press \[\text{Menu}\] > Messaging > Settings.
Setting Message Reminders
When new messages arrive, you can choose to have your phone notify you by playing an audible alert.

1. Press \> Settings > Messaging > Message Reminder.
2. Select Text Message, Picture Msg, or Voicemail.
3. Select Repeat or Ringer Length.
4. Select a setting and press \.

Adding a Customized Signature
Add a customized signature to each message you send.

1. Press \> Settings > Messaging > Signature.
2. Select On. (If you do not wish to attach a signature to your outgoing messages, select Off.)
3. Enter your signature in the Text field. (See “Entering Text” on page 25.)
4. Press .

Managing Preset Messages
Your phone is loaded with twenty preset messages, in English and in Spanish, to help make sending text messages faster and easier. These messages, such as “Where are you?,” “Let’s get lunch,” and “Meet me at,” can be customized to suit your needs or add your own messages to the list.
To edit or delete a preset message:
1. Press > Settings > Messaging > Preset Msgs. (The list of preset messages is displayed.)
2. Select the message you want to edit or delete and press Options (right softkey).
3. Select Edit, and edit the message and press . – or –
   Select Delete > Yes (left softkey) to delete the message. (You can also reset all messages by selecting Reset All Msgs > Yes [left softkey].)

To change the language of the preset messages:
1. Press > Settings > Messaging > Preset Msgs.
2. Press Options (right softkey) > Select Lang.
3. Select English or Spanish.

Setting Drafts Alert
With this feature, when you try to send an SMS Text message, you are reminded that there are unsent messages in the Drafts folder.
1. Press > Settings > Messaging > Drafts Alert.
2. Select On or Off.

Airplane Mode
Airplane Mode allows you to use many of your phone’s features, such as Games, Music, or Voice Memos, etc., when you are in an airplane or in any other area where making or receiving calls or data is prohibited. When your phone is in Airplane Mode, it cannot send or receive any calls or access online information.
1. Press > Settings > More... > Airplane Mode.
2. Read the disclaimer and press OK (left softkey).
3. Select On or Off.

While in Airplane Mode, your phone’s standby screen will display “Phone Off.”
TTY Use

A TTY (teletypewriter, also known as a TDD or Text Telephone) is a telecommunications device that allows people who are deaf, hard of hearing, or who have speech or language disabilities, to communicate by telephone.

Your phone is compatible with select TTY devices. Please check with the manufacturer of your TTY device to ensure that it supports digital wireless transmission. Your phone and TTY device will connect via a special cable that plugs into your phone’s headset jack. If this cable was not provided with your TTY device, contact your TTY device manufacturer to purchase the connector cable.

When establishing your wireless service, please call your service provider via the state Telecommunications Relay Service (TRS) by first dialing 7 1 1 TALK. Then provide the state TRS with this number: 866-727-4889.

1. Press Settings > More... > Accessibility > TTY. (An informational message will be displayed.)
2. Read the disclaimer and press OK (left softkey).

3. Select On to turn TTY mode on.
   – or –
   Select Off to turn TTY mode off.

Note
In TTY mode, your phone will display the TTY access icon.

If TTY mode is enabled, the audio quality of non-TTY devices connected to the headset jack may be impaired.

WARNING
911 Emergency Calling
It is recommended that TTY users make emergency calls by other means, including Telecommunications Relay Services (TRS), analog cellular, and landline communications. Wireless TTY calls to 911 may be corrupted when received by public safety answering points (PSAPs), rendering some communications unintelligible. The problem encountered appears related to TTY equipment or software used by PSAPs. This matter has been brought to the attention of the FCC, and the wireless industry and the PSAP community are currently working to resolve this.
Phone Setup Options

Navigation Key Shortcuts
You can use the navigation keys as shortcuts to access specific menu items directly from standby mode. With this feature, you can reassign the shortcuts to the menu items you choose.

1. Press > Settings > More... > Navigation Keys.
2. Select the navigation key you wish to reassign and press.
3. Using the navigation key or your keypad, select a shortcut and press Assign (left softkey) to save. (If there are additional levels available, press before selecting your shortcut.)

My Favorites
Your phone offers you the option of assigning a shortcut to a favorite or often-used function. Pressing Favorites (left softkey) in standby mode will launch your personally designated shortcut.

1. Press Favorites (left softkey) to display the My Favorites list.
2. Select <Add Favorite>.
3. Using the navigation key or your keypad, select functions to be assigned to the My Favorites list.
4. Press Assign (left softkey) to save.

Tip While My Favorites list is displayed, press Options (right softkey) to customize the list according to your needs.

Auto-Answer Mode
Set your phone to automatically answer incoming calls with an optional hands-free device or in speakerphone mode. Remember, your phone will answer calls in Auto-Answer mode even if you are not present.

1. Press > Settings > More... > Call Setup > Auto-Answer.
2. Select an option and press.
   - Hands-free to answer calls automatically when the phone is connected to a hands-free device (sold separately).
   - Speakerphone to answer calls automatically in speakerphone mode.
3. Select 5 Seconds, 15 Seconds, or Off.
Call Answer Mode
Select how to answer incoming calls on your phone: whether you want to be required to press \texttt{TALK}, to press any number key, or simply to open the phone.

1. Press \	exttt{W} > Settings > More... > Call Setup > Call Answer.
2. Select Talk Key, Any Key, or Flip Open.

Side Key Guard
This feature enables you to lock external keys while the phone is closed.

1. Press \	exttt{W} > Settings > More... > Side Key Guard.
2. Select On or Off.

<table>

</tbody>
</table>

Setting Abbreviated Dialing
To activate the Contacts Match feature:
1. Press \	exttt{W} > Settings > More... > Call Setup.
2. Select Contacts Match > On.

To activate the Prepend feature:
1. Press \	exttt{W} > Settings > More... > Call Setup > Abbrev. Dial.
2. Select Prepend > On.
3. Enter the first five- or six-digit prefix in the Prepend# field and then press \texttt{OK} (left softkey).
   - To deactivate this feature, select \texttt{Off} during step 2 above.

Headset Mode

This feature allows you hands-free phone use. Press the Turbo Button (the operation button) on the headset to activate useful functions.

To set the headset mode:
1. Press \(\text{Settings} > \text{More...} > \text{Headset Mode}\).
2. Select Turbo Button.
3. Select an option and press \(\text{Menu}\).
   - On: Press the Turbo Button to activate Voice Dial. Press twice to redial the last call. Press and hold to activate the ASR function.
   - Off: Select Off if you do not wish to assign a Turbo Button setting or if your headset does not have a Turbo Button.

To set the ringer sound:
1. Press \(\text{Settings} > \text{More...} > \text{Headset Mode}\).
2. Select Ringer Sound > Normal or Headset Only.

Browser Settings

Customize your phone’s Web browser settings.

Editing Bookmarks

Edit, sort, and delete Web browser bookmarks.

1. Press \(\text{Settings} > \text{More...} > \text{Browser} > \text{Bookmarks}\).
2. Scroll to highlight a bookmark and press Options (right softkey).
3. Select an option and press \(\text{Menu}\).
   - Show Page displays the Web page of the selected bookmark.
   - Edit to edit the title or address of a selected bookmark.
   - Set Home to set the selected bookmark to be your homepage.
   - Delete to delete a selected bookmark.
   - Delete All to delete all bookmarks saved in the phone.
   - Reorder to change the order of the bookmarks.
Deleting Browser Cache Files and Cookies
With this feature, you can delete the browser cache (temporary files) and “cookies” saved in the phone.

1. Press \( \text{Menu} \) > Settings > More... > Browser.
2. Select Delete Web Cache or Delete Web Cookies.
3. If you are certain you would like to delete, press OK (left softkey) > Yes (left softkey).

Editing the Home Page
This feature allows you to edit the URL of the home page on your phone.

1. Press \( \text{Menu} \) > Settings > More... > Browser > Edit Home Page.
2. Use your keypad to edit the URL and press OK (left softkey) to save your changes.

Phone Information Management

Displaying Your User Address
Press \( \text{Menu} \) > Settings > Phone Info > Phone#/UserID.

Displaying Icon Definitions
1. Press \( \text{Menu} \) > Settings > Phone Info > Icon Glossary.
2. Select the item for which you want to see the explanation and press \( \text{Menu} \).

Displaying Version Information
To display the version number of the software, hardware, PRL (Preferred Roaming List), PRI (Product Release Instructions), etc., installed on your phone:
Press \( \text{Menu} \) > Settings > Phone Info > Version.

Note
You can update the software and PRL versions manually. Highlight Software or PRL and press Update (left softkey).
Displaying Advanced Information

To display advanced information such as frequency and other technical data:

- Press > Settings > Phone Info > Advanced.
Section 2C

Security

- Accessing the Security Menu (page 47)
- Using Your Phone’s Lock Feature (page 48)
- Restricting Calls (page 49)
- Using Special Numbers (page 50)
- Deleting Phone Content (page 50)
- Resetting Phone Content (page 51)
- Security Features for Data Service (page 51)

By using the security settings on your phone, you receive peace of mind without sacrificing flexibility. This section will familiarize you with your phone’s security settings. With several options available, you can customize your phone to meet your personal needs.

Accessing the Security Menu

Your phone’s security settings are available through the Security menu. You must enter your lock code to view the Security menu.

1. Press \(\text{Settings} \rightarrow \text{Security} \).
2. Enter your lock code to display the Security menu.

Tip
If you can’t recall your lock code, try using the last four digits of your wireless phone number. If this doesn’t work, contact your service provider.
Using Your Phone’s Lock Feature

Locking Your Phone
When your phone is locked, you can only receive incoming calls or make calls to 911 or special numbers. (See “Using Special Numbers” on page 50.)

1. From the Security menu, select **Lock My Phone > Lock Now**. (To set your phone to lock the next time it is turned on, select **On Power-up**.)
2. Select **Full Lock** or **Exp. Incom.Calls**.
   - **Full Lock**: You can receive incoming calls from the special numbers only.
   - **Exp. Incom.Calls**: You can receive all incoming calls.

Unlocking Your Phone
1. From standby mode, press **Unlock** (left softkey).
2. Enter your lock code.

Changing the Lock Code
1. From the Security menu, select **Change Lock Code**.
2. Enter and re-enter your new lock code.

Calling in Lock Mode
You can place calls to 911 and to your special numbers when in lock mode.

**Note**
You can call only emergency numbers while Voice is set to **Locked** in Restrict and Lock (see “Locking Voice Calls” below).

To place an outgoing call in lock mode:

► To call an emergency number or a special number, enter the phone number and press **Talk**.

Locking Voice Calls
With this feature, you can lock incoming and outgoing voice calls (except 911).

1. Press **Menu > Settings > More... > Restrict and Lock**.
2. Select **Voice**, and then enter your lock code.
3. Select **Lock > Locked**. (Select **Unlocked** to deactivate this feature.)
Locking the Camera/Pictures Menus

1. Press 📞 > Settings > More... > Restrict and Lock.
2. Select Camera/Pictures, and then enter your lock code.
3. Select an option and press 📞.
   - Unlocked to unlock the current Camera/Pictures lock feature.
   - Lock Camera to lock the camera.
   - Lock Pictures to lock My Albums.
   - Lock All to lock the camera and access to Pictures menus.

Restricting Calls

There may be occasions when you want to limit the numbers your phone can call or from which it can receive calls. You can use the Restrict setting to do just that. (The Restrict setting does not apply to 911.)

1. Press 📞 > Settings > More... > Restrict and Lock.
2. Select Voice, and then enter your lock code.
3. Select Restrict > Incoming Calls or Outgoing Calls.
4. Select an option and press 📞.
   - Allow All to make or receive all calls.
   - Contacts Only to make or receive calls to or from Contacts entries, voicemail, or special numbers only.
   - Special #s Only to make or receive calls to or from three special numbers only. (See “Using Special Numbers” on page 50.)

Note: Restricted incoming calls are forwarded to voicemail.
Using Special Numbers

Special numbers are important numbers that you have designated as being "always available." You can make or receive calls to or from special numbers even if your phone is locked.

You can save up to three special numbers in addition to your Contacts entries. (The same number may be in both directories.)

To add or replace a special number:
1. From the Security menu, select Special Numbers.
2. Select a field for your entry.
3. Enter the number and press ◀.

Note: There are no speed dial options associated with special numbers.

You cannot make calls to or receive calls from special numbers if Voice is set to Locked in Restrict and Lock.

Deleting Phone Content

You can quickly and easily delete all the content that you have created in your phone.

1. From the Security menu, select Delete/Reset.
2. Select an option and press ◀.
   - Delete Web Cookies to delete all Web cookies saved in the phone.
   - Delete Web History to delete all Web history saved in the phone.
   - Delete Web Cache to delete all Web cache memory saved in the phone.
   - Delete Contacts to delete all of your Contacts entries.
   - Delete My Content to delete all items you have downloaded to your phone.
   - Delete Pictures to delete all pictures saved in the phone.
   - Delete Voice Data to delete all voice data and call memos saved in the phone.
- **Delete Message** to delete all messages (including locked ones) in the Inbox, Sent Mail, Pending, and Drafts folders; all Recent Lists; and all user-created preset messages (text messages, etc.).

3. If you are certain you would like to delete, press **OK** (left softkey), and then **Yes** (left softkey).

## Resetting Phone Content

You can quickly and easily reset the content in your phone.

1. From the Security menu display, select **Delete/Reset**.
2. Select an option and press **OK**.
   - **Reset Browser** to reset your Web browser’s history, bookmarks, cookies, auto-complete text, and URLs.
   - **Reset Favorites** to reset all of your My Favorites settings.
   - **Reset Picture Msg** to reset your authentication ID for your picture messaging account.
   - **Reset All Settings** to restore all the factory defaults, including the ringer types and display settings. The Contacts, History, Calendar, and Messaging are not affected.

- **Reset Phone** to reset all settings and erase all data on your phone.

3. Read the disclaimer and press **OK** (left softkey).
4. If you are certain that you would like to reset, press **Yes** (left softkey).

## Security Features for Data Service

### Enabling and Disabling Data Service

You can disable the data service without turning off your phone; however, you will not have access to all data services, including Web and messaging. Disabling data services will avoid any charges associated with data services. While signed out, you can still place or receive phone calls, check voicemail, and use other voice services. You may enable data services again at any time.

**To disable data services:**

1. Press **Settings > More... > Web > Disable Web**. (A message is displayed.)
2. Press **Disable** (right softkey) to confirm that you want to sign out.
To enable data services:

1. Press \( \text{Menu} \) > Settings > More... > Web > Enable Web. (A message will be displayed.)
2. Press OK (left softkey) to enable data services.

**Locking Data Services**

You can lock access to data services while signed in.

1. Press \( \text{Menu} \) > Settings > More... > Restrict and Lock.
2. Select Web > Off and Lock, and then enter your lock code.
3. Select Locked. (Select Unlocked to deactivate this feature.)
Section 2D

Roaming

- Understanding Roaming (page 53)
- Setting Your Phone’s Roam Mode (page 54)
- Using Call Guard (page 55)
- Using Data Roam Guard (page 56)

Roaming is the ability to make or receive calls when you’re off the home network. Your new KATANA® LX by SANYO works anywhere on the home network and allows you to roam on 1900 and 800 MHz digital networks. This section explains how roaming works as well as special features that let you manage your roaming experience.

Understanding Roaming

Recognizing the Roaming Icon on the Display Screen

Your phone’s display screen always lets you know when you’re off the home network. Anytime you are roaming, the phone displays the roaming icon ( ).

Tip
Remember, when you are using your phone off the home network, always dial numbers using 11 digits (1 + area code + number).

Roaming on Other Digital Networks

When you’re roaming on digital networks, your call quality and security will be similar to the quality you receive when making calls on the home network. However, you may not be able to access certain features, depending on the available network.
Checking for Voicemail Messages While Roaming

When you are roaming off the home network, you may not receive on-phone notification of new voicemail messages. Callers can still leave messages, but you will need to periodically check your voicemail for new messages if you are in a roaming service area for an extended period of time.

1. Dial 1 + area code + your phone number.
2. When you hear your voicemail greeting, press #.
3. Enter your passcode at the prompt and follow the voice prompts.

Setting Your Phone’s Roam Mode

Your phone allows you to control your roaming capabilities. By using the Roaming menu option, you can determine which signals your phone accepts.

Set Mode

Choose from three different settings on your phone to control your roaming experience.

1. Press * > Settings > More... > Roaming > Set Mode.
2. Select an option and press #.
   - **Home Only** to access the home network only and prevent roaming on other networks.
   - **Automatic** to seek service on the home network.
   - **Roaming Only** to seek a roaming system only. The previous setting (Home Only or Automatic) is restored the next time the phone is turned on.

Note

If you’re on a call when you leave the home network and enter an area where roaming is available, your call is dropped. If your call is dropped in an area where you think service is available, turn your phone off and on again to reconnect to the home network.
Using Call Guard

Your phone has two ways of alerting you when you are roaming off the home network: the onscreen roaming icon and Call Guard. Call Guard makes it easy to manage your roaming charges by requiring an extra step before you can place or answer a roaming call. (This additional step is not required when you make or receive calls while on the home network.)

To turn Call Guard on or off:
1. Press > Settings > More... > Roaming > Call Guard.
2. Select On or Off.

To place roaming calls with Call Guard on:
1. From standby mode, dial 1 + area code + the seven-digit number and press TALK.

2. Press 1 to proceed while the pop-up message is displayed.
   – or –
   Press any key to delete the pop-up message, and then press Options (right softkey) > Roam Call.

To answer incoming roaming calls with Call Guard on:
1. Press TALK. (A message will be displayed notifying you that roaming charges will apply.)
2. Press 1 to proceed while the pop-up message is displayed.
   – or –
   Press any key to delete the pop-up message, and then press Options (right softkey) > Answer.

Note Call Guard is turned off by default on your phone.
Voice dialing and speed dialing are not available when you are roaming with Call Guard enabled.

Note If the Call Guard feature is set to On, you need to take extra steps to make and receive roaming calls.
Using Data Roam Guard

Depending on service availability and roaming agreements, your phone may be able to access data services while roaming on certain digital systems. You can set your phone to alert you when you are roaming off the home network and try to use data services such as messaging.

To set your Data Roam Guard notification:

1. Press > Settings > More... > Roaming > Data Roaming.
2. Select an option and press .
   - **Default** sets your phone’s Data Roam Guard feature on. You may see a prompt and may be required to respond when you access data services while roaming internationally.
   - **Always Ask** to enable your phone’s Data Roam Guard feature. You will see a prompt and will be required to respond anytime you access data services while roaming.
   - **Never Ask** to disable your phone’s Data Roam Guard feature. You will not be notified of your roaming status when accessing data services.

To use data services when Data Roam Guard is active:

- When a pop-up notification appears informing you that data roam charges may apply, press **Roam** (left softkey) to connect.
Managing History

History keeps track of incoming, outgoing, or missed phone calls. This section guides you through accessing and making the most of your History.

Viewing History

History shows up to the 60 most recent phone calls you have placed, received, or missed. Each history entry contains the phone number (if available) and Contacts entry name (if the phone number is in your Contacts). Duplicate calls (same number and type of call) may only appear once on the list.

To display your History:

- From standby mode, press TALK or SPEAKER.
- or -
- Press MENU > History.

The current day’s history appears under Today, and the previous day’s history appears under Yesterday. Other history includes date information.

Note

History records only calls that occur while the phone is turned on. If a call is received while your phone is turned off, it will not be included in the phone’s History.

You can access your Contacts list by selecting Go to Contacts.
History Icon Indication

You can determine the type of phone call that was placed, accepted, or missed from the icons shown below.

- 📞 – Incoming Call
- 📞 – Outgoing Call
- 📞 – Missed Call

History Thread

The History thread screen shows all history of a selected history entry.

To display a History thread:

- From the History list display, select the entry you wish to view and press 📞.

Tip

SMS messages are included in the History thread.

History Details

To display History details:

- From a History thread display, select an entry and press 📞.

The History details screen shows the call type, phone number, and date and time of the call. An onscreen menu is also displayed according to the type of call. See “History Menu Options” shown below.

To make a call from History details screen, press 📞.

History Menu Options

You may see several menu items on the onscreen menu or by pressing Options (right softkey).

- Call to dial the phone number.
- Call:Speaker On to dial the phone number in speakerphone mode.
- Save Contact to save a phone number. See “Saving a Phone Number From History” on page 59.

ContactDetails is displayed when the name and number are already in your Contacts.
● **Prepend** to add numbers to the beginning of a phone number. (See “Prepending a Phone Number From History” on page 60.)

● **Delete** to delete an entry. **Delete All** to delete all entries in the History. (See “Deleting History” on page 60.)

● **Send Message** to send an SMS Text message.

● **New Group** to access a Group entry menu to create a new Group entry. (See “Making a New Group Entry From History” on page 60.)

● **Rename** to change an entry’s current name to Caller ID name.

**Note** Some options may not be displayed for calls identified as No Caller ID or Restricted.

### Making a Call From History

**To make a phone call from History:**

1. From the History list display, use your navigation key to select an entry and press TALK.

**Tip** You can also send a message when the left softkey displays the Send Msg option.

### Saving a Phone Number From History

Your phone can store up to 300 Contacts entries. Contacts can store up to a total of 500 phone numbers.

**To save a Contacts entry from History:**

1. From the History list display, highlight an entry and press Options (right softkey) > Save Contact.

2. Select New Entry to create a new Contacts entry for the number or Existing Entry to save the number to an existing entry.

3. If New Entry was selected, select a phone type, and then use the keypad to enter the new entry name and press完工．
   — or —
   If Existing Entry was selected, select an existing entry to which you want to save the number, and then select a phone type and press完工．

4. Press Done (left softkey).
Making a New Group Entry From History

1. From the History list display, press Options (right softkey) > New Group.
2. Read the message and press Start (left softkey).
3. Scroll through the list and press after each selection. (A check mark will appear in the box next to the selected entry.)
4. When you’ve marked all the entries you want to add, press Continue (left softkey).
5. Enter a name for the new group and press .
6. Press Save (left softkey) to save the group entry.

Tip Press Options (right softkey) > Enter New Addr or Contacts to enter a new address or to select an entry from your Contacts.

Prepending a Phone Number From History

If you need to make a call from History and you are outside your local area code, you can add the appropriate prefix by prepending the number.

To prepend a phone number from History:

1. From the History list display, highlight an entry and press Options (right softkey) > Prepend.
2. Enter the prefix and press to call the number.

Deleting History

You can delete individual or all entries in your History using the Options menu.

1. From the History list display, highlight an entry you wish to delete and press Options (right softkey) > Delete. (Select Delete All if you wish to delete all entries in your History.)
2. If you are certain you want to delete the History, press Delete (left softkey).
Your phone’s Contacts helps you stay in touch with family, friends, and colleagues by keeping track of all their contact information. This section explains how to use your phone’s Contacts.

**About Contacts**

Your phone can store up to 300 Contacts entries. Contacts can store up to 500 phone numbers, 600 email addresses, and 300 Web addresses.

You can create two types of Contacts entries:

- **Personal Contacts Entries** (for individual contacts). Each entry can contain up to seven phone numbers, two email addresses, and one Web address.

- **Group Entries** to send a text or picture message to up to 25 group members simultaneously.

**Displaying the Contacts List**

- Press **Contacts** (right softkey).
  - or –
  - Press > **Contacts**.

If you highlight a name, the main (default) phone number is displayed. If a group entry is highlighted, a group icon and number of group members will also be displayed.
**Viewing History from Contacts**
You can view the history of the selected Contacts entry from the Contacts list.

- Highlight the entry and press **Options** (right softkey) > **Contact History**.

**Creating a New Contacts Entry**

**Creating a Personal Contacts Entry**

**Shortcut**
Enter the phone number in standby mode and press **MENU**. Proceed with steps 2-4 in “Saving a Phone Number” on page 22.

1. Press **Contacts** (right softkey) > **Add New** > **New Contact**.
2. Enter a name for the new entry and press the navigation key down.
3. Enter the phone number for the entry and press **ok**.
4. Select a phone type for the entry (Mobile, Home, Work, Pager, Fax, or Other) and press **ok**.
5. Press **Done** (left softkey).

After you have saved the number, the new Contacts entry is displayed.

**Tip**
**ICE – In Case of Emergency**
To make it easier for emergency personnel to identify important contacts, you can list your local emergency contacts under “ICE” in your phone’s Contacts list. For example, if your mother is your primary emergency contact, list her as “ICE–Mom” in your Contacts list. To list more than one emergency contact, use “ICE1–___,” “ICE2–___,” etc.

**Creating a Group Entry**
You can create a group entry by giving it a name and assigning members to it.

**To create a Group entry:**
1. Press **Contacts** (right softkey) > **Add New** > **New Group**.
2. Read the message and press **Start** (left softkey).
3. Scroll through the list and press **ok** after each selection. (A check mark will appear in the box next to the selected entry.)
4. When you’ve marked all the entries you want to add, press **Continue** (left softkey).
5. Enter a name for the new group and press **OK**.
6. Press **Save** (left softkey) to save the group entry.

### Finding Contacts Entries

There are several ways to display your Contacts entries: by name, by Automatic Speech Recognition (ASR), by speed dial number, and by group. Follow the steps outlined in the following sections to display entries from the Contacts menu.

#### Finding Contacts by Name

1. Press **Contacts** (right softkey).
2. Scroll through all the entries.
   - **– or –**
     Enter the first letter of a name or part of a name. (The more letters you enter, the more your search narrows.)
3. To display an entry, select it and press **OK**.

#### Finding Contacts by Automatic Speech Recognition (ASR)

1. Press and hold **TALK** or **SPEAKER**.
2. Say “Call” and then the name or part of the phone number you would like to find. If the software finds multiple matches, a list of the most likely names or phone numbers is displayed. You will hear the voice prompt “Did you say” followed by the matched name.
3. Say “Yes” to confirm the name, or “No” to change the selection.

**Note**
Your phone will automatically place a call if only one name or number matches your input.
Finding Group Entries

1. Press Contacts (right softkey).
2. Scroll through the group entries using your navigation key.
   To display Contacts entries belonging to a group, highlight the group and press Menu.
3. To dial the entry’s default phone number, select the entry and press Talk.

Finding Speed Dial Numbers

1. Press Menu > Settings > More... > Contacts > SpeedNumbers.
2. Scroll through speed dial entries. Speed dial numbers are displayed in numeric order.
3. To dial the phone number assigned to a speed dial number, press Talk.

Displaying the Details Screen

To display the details screen:

1. From the Contacts list, select a Contacts entry for which you would like to see the details and press Menu.
2. Highlight any information and press Talk. You will see onscreen menu options for the information displayed.
3. If you select a group entry, entries or phone numbers belonging to the group entry are displayed. Press Options (right softkey) to display the menu options.

For details of each menu, see “Contacts Menu Descriptions” on page 67.
Editing a Contacts Entry

Adding a Phone Number to a Personal Contacts Entry

1. From the Contacts list display, highlight the entry to which you want to add a phone number and press Options (right softkey) > Edit Contact.
2. Scroll down to highlight <Add Number> and enter the new phone number and press.
3. Select a phone type for the number and press.

Adding Group Members to the Group Entry

You can add group members to an existing group entry. Each group can include up to 40 members. You can enter a group member directly or select the member from your Contacts.

1. Display the Contacts list, scroll to the group you want to add members to, and press.
3. Read the message and press Start (left softkey).
4. Highlight each member you want to add and press after each selection. (A check mark will appear in the box next to the selected member.)
5. Press Continue (left softkey) > Save (left softkey).

Assigning Speed Dial Numbers

Your phone can store up to 98 phone numbers in speed dial locations. (For details on how to make calls using speed dial numbers, see “Using Speed Dialing” on page 24.)

To assign a speed dial number:

1. From the Contacts list, select a Contacts entry that has a phone number to which you would like to assign a speed dial and press.
2. Highlight the number and press Options (right softkey) > Set Speed Dial.
3. Select an available speed dial location and press.
   -- or --
1. Press > Settings > More... > Contacts > SpeedNumbers.
2. Select an available speed dial location and press.
3. Select an entry from the list and press 
   The entry’s default phone number is assigned.
   - To select another phone number in the entry, press the
     navigation key right or left.

   **Note** If you attempt to assign an already in-use speed dial
   location to a new phone number, a message will appear asking if you wish to replace the existing speed dial
   assignment. Select **Replace** to assign the location to the new phone number and delete the previous speed
   dial assignment.

### Editing a Contacts Entry’s Information

**To edit a personal Contacts entry’s information:**

1. Display the Contacts list and highlight the entry you wish to edit.
2. Press **Options** (right softkey) > **Edit Contact**.
3. Select the field you wish to edit, and then add or edit the information and press 

**To edit a Group entry:**

You can change the group name, the assigned image, or add new members to the group.

1. Display the Contacts list and highlight the group you want to edit.
2. Press **Options** > **Edit Group**.
3. Change the group name or the image.
   - See “Adding Group Members to the Group Entry” to add a member.
4. Press **Save** (left softkey) to save your changes.

### Selecting a Ringer Type for a Personal Contact Entry

Assign a ringer type to a Contacts entry so you can identify the caller by the ringer type. (See “Ringer Types” on page 30.)

1. From the Contacts list, select a Contacts entry to which you would like to assign a ringer and press 
2. Select the current ringer type and press 
   to display the Ringer menu.
3. Select **Change**.
4. Select an option and press 
5. Select a ringer and press .
Assigning an Image to a Contacts Entry
You can assign an image to a Contacts entry. The image is displayed when the entry calls you.

1. From the Contacts list, select a Contacts entry to which you would like to assign an image and press [MENU].
2. Press the navigation key to highlight the icon and press [OK].
4. Select an option and press [OK].
5. Select an image and press [OK], and then press OK (left softkey) to assign.

Deleting a Contacts Entry

To delete a personal Contacts or a group entry:

1. Display the Contacts list and highlight an entry you wish to delete.
2. Press Options (right softkey) > Delete Contact or Delete Group > Yes (left softkey).

To remove a group member from a Group entry:

1. Display the Contacts list, scroll to the group from which you want to delete the member, and press [MENU].
2. Press Options (right softkey) > Edit Group.
3. Highlight the member you want to delete and press Options (right softkey) > Remove from Gr. > Yes (left softkey).
4. Press Save (left softkey).

Contacts Menu Descriptions
You may see several menu items on the onscreen menu or by pressing Options (right softkey).

In the Contacts List:
- New Contact to create a new Contacts entry. See “Creating a Personal Contacts Entry” on page 62.
- New Group to create a new group entry. See “Creating a Group Entry” on page 62.
- Edit Contact to edit the selected Contacts entry. Edit Group appears if a group entry is selected. See “Editing a Contacts Entry” on page 65.
- Delete Contact to delete the selected Contacts entry. Delete Group appears if a group entry is selected. See “To delete a personal Contacts or a group entry” on this page.
- **Contact History** to display the selected Contacts entry's history. See “Viewing History from Contacts” on page 62.
- **Send Message** to send a text message to the selected Contacts entry.
- **Send Contact** to send the selected Contacts entry via Bluetooth.
- **Set as Secret** to make the selected entry secret. See “Secret Contacts Entries” on page 69.
- **Settings** to display the Settings menu.

On the Details screen only:
- **Edit** to edit the selected Contacts information.
- **Prepend** to alter a phone number by adding numbers to the beginning of the entry. See “Prepending a Phone Number From History” on page 60.
- **Delete #** to delete the selected phone number.
- **Set as Main #** to set the selected number as the main (default) number for the Contacts entry.
- **Call Alarm** to set a Call Alarm for the selected phone number.
- **View History** to view the history of the selected Contacts entry.

- **Set Speed Dial** to assign a Speed Dial number to the selected phone number.

On the Group Details screen only:
- **Save Contact** to save the selected entry to your Contacts. **ContactDetails** appears if the entry is already saved in your Contacts.

Onscreen menu only:
- **Call** to call the selected phone number.
- **Set # Type** to select a number type (mobile, home, etc.)
- **Launch** to connect to a selected URL.
- **Set as Favor.** to set a selected URL as My Favorite.
- **Edit** to edit the selected information.
- **Clear** to erase a current memo or address.
Secret Contacts Entries

You can hide an entry by making it secret. The entry is not displayed in your Contacts. In History, a telephone number is displayed but the Contacts entry’s name is not.

To make an entry secret:

1. From the Contacts list, highlight a Contacts entry.
2. Press Options (right softkey) > Set as Secret.
4. From the Contacts list, press Options (right softkey) > Settings > Hide Secret.
5. Enter your four-digit lock code.

To make an entry public:

1. From the Contacts list, press Options (right softkey) > Settings > Show Secret.
2. Enter your four-digit lock code.

Note: If you make an entry secret, calls cannot be made to that entry if Contacts Only is selected in Settings > More... > Restrict and Lock > Voice > Restrict > Outgoing or Incoming Calls (see page 49).

Tip: If you can’t recall your lock code, try using the last four digits of your wireless phone number. If this doesn’t work, contact your service provider.

Note: If you make an entry secret, calls cannot be made to that entry if Contacts Only is selected in Settings > More... > Restrict and Lock > Voice > Restrict > Outgoing or Incoming Calls (see page 49).
Section 2G

Calendar and Tools

- Using Your Phone’s Calendar (page 70)
- Using Your Phone’s Tools (page 75)

Your phone is equipped with several personal information management features that help you manage your busy lifestyle. This section shows you how to use these features to turn your phone into a time management planner that helps you keep up with your contacts, schedules, and commitments.

Using Your Phone’s Calendar

Displaying your Calendar

To display your calendar:

- Press \& [Tools] > Calendar.

Note: If your phone has been turned off, and you are in an area with no service when you turn your phone back on, you will need to manually set the date and time to use the calendar function.

To add a holiday:

1. From the calendar display, highlight the date you want to add as a holiday.
2. Press Options (right softkey) > Holiday.
3. Select an option and press \&.
   - Set Date to set the holiday for the date.
   - Set Weekly to set the holiday for the same day every week. Press Yes (left softkey) to set a weekly holiday.
To edit added holidays:

1. From the calendar display, highlight a day you have set as holiday.
2. Press Options (right softkey) > Holiday.
3. Select an option and press OK.
   - **Reset Date** to reset (clear) a holiday for the highlighted date only.
   - **Reset Weekly** to reset a holiday that recurs on the same day each week. Press Yes (left softkey) to clear the weekly holiday.
   - **Reset All** to reset all added holidays. Press Yes (left softkey) to clear.

Adding an Event to the Calendar

Your Calendar helps organize your time and reminds you of important events.

1. Press Menu > Tools > Calendar.
2. Highlight a day and press Options (right softkey) > Add Event > Schedule.
3. Select any of the following items you want to set and press OK.
   - **Description** to enter a description of the event.

   **Tip** You can retrieve a description from the To Do List by pressing Mode (right softkey) > From To Do once you have stored To Do items to the To Do List.

   - **From** to set a start time for the event. Use your keypad or navigation key to set the hours, minutes, and AM or PM.
   - **To** to set an end time for the event. Use your keypad or navigation key to set the hours, minutes, and AM or PM.
   - **Location** to add a location for the event.
   - **Alarm** to select a ringer type for the alarm.
   - **Alarm Time** to edit the alarm time (number of hours or minutes before the event starts). The default alarm time is 10 minutes before an event.
   - **Repeat** to select a repeating status for the event (Once, Daily, Weekly, Monthly, or Yearly).
4. Press Save (left softkey) to save the event.
Adding a Call Alarm to the Calendar

You can set call alarms to notify you when you need to place a call. The call alarm will let you know when and to whom to place a scheduled call. You can set up to 15 call alarms.

To add a call alarm to the calendar:

1. Press > Tools > Calendar.
2. Select a day and press Options (right softkey) > Add Event > Call Alarm.
3. Enter the phone number directly or press Options (right softkey) > From Contacts or Voicemail.
   - From Contacts to select a number from your Contacts.
   - Voicemail to select the number for voicemail access.
4. Select the items to edit and press .
   - Time/Date to edit the start time and date.
   - Alarm to select the ringer alarm.
   - Repeat to set the Call Alarm’s repeat status (Once, Daily, Weekly, Monthly, or Yearly).
5. Press Save (left softkey).

Tip You can also add a call alarm from the Contacts menu. (See “Contacts Menu Descriptions” on page 67.)

To call the phone number at the time of a call alarm notification:

- Press TALK to dial the phone number (if applicable).

To respond to a call alarm, see “Event Alerts” below.

Event Alerts

When your phone is turned on and you have an event alarm scheduled, your phone alerts you and displays the event summary. There are several ways your phone alerts you to scheduled events:

- By playing the assigned ringer type.
- By illuminating the backlight.
- By flashing the LED.

To silence the alarm, press any key. (The alarm will stop and then sound again after the selected snooze interval.)

Press Dismiss (right softkey) to dismiss the event.
Viewing Events

To view your scheduled events:

1. Press Menu > Tools > Calendar.
2. Highlight a day and press (If you have multiple events scheduled for the selected day, they will be listed in chronological order.)
3. To display the details of an event listed in the schedule, highlight the event and press .

Event List Options

While you are displaying the day’s events list, press Options (right softkey) to access the following options:

- **Add Event** to add an event or Call Alarm to the calendar.
- **Delete Event** to delete the selected event or Call Alarm from the list.
- **To Do List** to display the To Do List on the calendar.
- **Go to Date** to jump to another date on the calendar.
- **View Memory** to view the memory status saved in the phone.
- **Delete Memory** to delete memory saved in the phone.

Going to a Specified Date

1. Press Menu > Tools > Calendar > Options (right softkey) > Go to Date.
2. Enter a date and press .
Deleting Events

To delete a day’s scheduled events:
1. Press > Tools > Calendar.
2. Select a day and press .
3. Highlight an event and press Options (right softkey) > Delete Event > Yes (left softkey).

To delete old events:
Press > Tools > Calendar > Options (right softkey) > Delete Memory > Delete Old > Yes (left softkey).

To delete all scheduled events:
1. Press > Tools > Calendar > Options (right softkey) > Delete Memory > Delete All. (An alert will be displayed asking you to confirm the deletion.)
2. Press Yes (left softkey) to delete all events; press No (right softkey) to cancel.

Adding To Do List Items

Your phone can store and manage up to 20 To Do List items.
1. From the Calendar display, press Options (right softkey) > To Do List > Options (right softkey) > Add Item.
2. Enter a description and press .
3. Select Priority to edit the To Do’s priority (Normal, Urgent, or Done).
4. Press Save (left softkey) to save the To Do items.

Adding a To Do List Item to the Schedule

1. From the Calendar display, press Options (right softkey) > To Do List.
2. Select an item to add to the schedule and press Options (right softkey) > Add to Schedule.
3. Modify the description field (if desired), and set the other fields using your keypad and press . (See “Adding an Event to the Calendar” on page 71.)
4. Press Save (left softkey).
Deleting To Do Items

1. Press \( \text{Menu} \) > Tools > Calendar.
2. Press Options (right softkey) > To Do List.
3. Highlight a To Do item and press Options (right softkey) > Delete Item.
   - Delete All to delete all To Do items.
   - Del. Selection to delete selected To Do items.
4. Press Yes (left softkey).

Using Your Phone’s Tools

Using the Alarm Clock

Your phone comes with a built-in alarm clock with multiple alarm capabilities.

1. Press \( \text{Menu} \) > Tools > Alarm Clock.

   Note
   If your phone has been turned off, and you are in an area with no service when you turn your phone back on, you will need to manually set the date and time to use the alarm function.

2. Select an alarm number and press \( \text{Menu} \).
3. Enter the alarm description using the keypad and press \( \text{Menu} \).
4. Select Time to set a time for the alarm, and press \( \text{Menu} \).
   - Set the hours, minutes, and AM or PM.
5. Select **Repeat** field to set a repeat status for the alarm and press \( \text{Menu} \).
   - Highlight **Once**, **Daily**, **Mon – Fri**, or **Sat and Sun** and press \( \text{Menu} \).

6. Select **Alarm** field to turn the alarm on or off and press \( \text{Menu} \).
   - Select **On** or **Off** and press \( \text{Menu} \).

7. Press **Save** (left softkey) to save the alarm settings.

### Tip
Press the left softkey (**On** or **Off**) to toggle the alarm on and off.

To change the alarm settings, press **Settings** (right softkey) to set the ringer length and snooze options.

### To stop the alarm:
- Press any key. (The alarm will stop and then sound again after the selected snooze interval.)
- Press **Dismiss** (right softkey) to dismiss the event.

---

### Using the Stopwatch

#### To start the stopwatch:
- Press \( \text{Menu} \) > **Tools** > **Stopwatch**.
  - Press **Start** (left softkey) to start the stopwatch.
  - Press **Stop** (left softkey) to stop the stopwatch.
  - Press **Resume** (left softkey) to restart the stopwatch.

#### To record a lap time while the stopwatch is running:
- Press **Lap** (right softkey) to record the first lap time.
- Press **Lap** (right softkey) again to record the next lap. (Up to five lap times can be displayed. If you continue recording, lap times will be deleted starting with the oldest.)

#### To display the stopwatch options:
1. From the stopwatch display, press **Options** (right softkey).
2. Select an option and press \( \text{Menu} \).
   - **Go to Lap List** to display a saved Lap List. Select **Detail** (left softkey) to display the Lap List detail.
   - **Save to LapList** to save the recorded lap times (not available when no lap time is saved).
   - **Reset** to reset the time to zero and clear any recorded lap times.
Using the Countdown Timer
This feature allows you to use the countdown timer with alarm capabilities. You can set up to five timers.

1. Press \( \text{Menu} \) > Tools > Countdown.
2. Select a countdown timer number and press \( \text{Menu} \).
3. Select items to edit and press \( \text{Menu} \).
   - Description to enter a description of the countdown.
   - Time to enter the countdown time.
   - Alarm to set the countdown alarm on or off.
4. Press Save (left softkey) to save the countdown settings.

To stop the alarm:
- Press any key. (The alarm will stop and then sound again after the selected snooze interval.)
- Press Dismiss (right softkey) to dismiss the event.

Tip
Press the left softkey (On or Off) to toggle the countdown alarm on and off.

To change the alert settings, press Settings (right softkey) to set the ringer length and snooze options.

World Clock
To view the time in different locations:

1. Press \( \text{Menu} \) > Tools > World Clock.
2. Press the navigation key left or right to scroll through different time zones.

Tip
Press Summer (left softkey) or Standard (right softkey) to select daylight saving or standard time (if applicable).

Using the Calculator
Your phone comes with a built-in calculator.

1. Press \( \text{Menu} \) > Tools > Calculator.
2. Enter numbers using your keypad.
   - Press the appropriate navigation key for an arithmetic option (+ - \( \times \) \( \div \)).
   - Press the left softkey to enter decimal points.
   - Press CLR (right softkey) to clear all numbers.
3. Press \( \text{Menu} \) for the result.
Section 2H

Voice Services

- Using ASR (page 78)
- Voice and Call Recording (page 81)
- Setting Up Screen Call (page 83)

Your phone’s Voice Services let you place calls using your voice, store voice reminders, and record memos right on your phone. This section includes easy-to-follow instructions for using automatic speech recognition (ASR) and managing voice and call memos.

Using ASR

Your phone is equipped with ASR that allows you to make calls or launch phone functions using your voice. All you have to do is to talk into the phone, and ASR will recognize your voice and complete tasks by itself.

Activating ASR

With the phone open:
- From standby mode, press and hold TALK or SPEAKER.

With the phone closed:
- Press and hold the operational button on your optional headset.

The phone displays “Say a command” screen and prompts you to say the name of the command you want to use. To complete your task, simply follow the voice prompts.

Available ASR commands are:
- **Call** to call an entry in your Contacts list or to the phone number you say. (See page 79 for details.)
- **Go To** <item or application> to jump directly to the menu items or applications. (See page 79 for details.)
Check <item> to check your phone’s status. (See page 80 for details.)

### Making a Voice Call Using ASR

With ASR, you can make a voice call by reciting a name or phone number.

1. Press and hold TALK or SPEAKER.
2. If you hear “Say a command,” say “Call.”
3. If you hear “Say the name or number,” say a name or a phone number.
4. If you hear “Which Location?,” say a phone type (for example, “Mobile”).

### Opening Menus Using ASR

You can jump directly to 17 menu items or applications by saying “Go to” followed by a menu option.

1. Press and hold TALK or SPEAKER.
2. If you hear “Say a command,” say “Go to.”
3. If you hear “Which shortcut?”, say an application name (for example, “Messaging”).

Shortcut To execute several commands at a time, you can say several commands in sequence (for example, “Call, John Jones, Mobile”).

Note If ASR does not recognize the name or number, it will find the most likely matches and display a list of up to three names or numbers. You will hear “Did you say” followed by the name or number. You can confirm by saying “Yes.” Say “No” to change the selection.

Shortcut To execute several commands at a time, you can say several commands in sequence (for example, “Go to Messaging”).
Checking Phone Status Using ASR

You can use ASR to obtain information about your phone:
- My Phone Number
- Network
- Signal Strength
- Battery
- Status (all of the above except phone number)

1. Press and hold TALK or SPEAKER.
2. If you hear “Say a command,” say “Check.”
3. If you hear “Which status item?,” say a command.

ASR Options

To change ASR confirmation:
1. Press and hold TALK or SPEAKER.
2. Press Settings (right softkey) > Confirmation and select an option.
   - Automatic to ask for confirmation only when the system is not sure what you said.
   - Always Confirm to always ask for confirmation.
   - Never Confirm to never ask for confirmation.

To adapt the system to your voice:
1. Press and hold TALK or SPEAKER.
2. Press Settings (right softkey) > Adaptation > Adapt Voice.
3. Press Start (left softkey) and repeat each word, phrase, or telephone number you hear.

To reset the adaptation, select Reset Voice on the step 2 above.

To change ASR mode:
1. Press and hold TALK or SPEAKER.
2. Press Settings (right softkey) > Modes and select an option.
   - Expert Mode to sound a beep only.
   - Prompt Mode to prompt for required information.
   - Readout Mode to prompt for required information and to read aloud the content displayed on the main screen.

To change ASR dialing region:
1. Press and hold TALK or SPEAKER.
2. Press Settings (right softkey) > Dialing Region and select an option.
North America to recognize only numbers valid in North America.
Other to recognize any number regardless of location.

To display ASR software version:
1. Press and hold TALK or SPEAKER.
2. Press Settings (right softkey) > About.

Voice and Call Recording

Use your phone’s voice recording to record brief memos to remind you of important events, phone numbers, or grocery list items and to record the other party’s voice during a phone call.

To record a voice memo:
1. Press > Tools > Voice Memo > Record.
2. Start recording after the beep.

To stop recording:
Press MENU, BACK, or END/0.

Note You can store up to 100 voice memos on your phone. Maximum recording time is up to three minutes.

To record a phone conversation:
1. During a call, press Options (right softkey) > Call Memo Rec.
2. Start recording after the beep.

To stop the recording of the conversation:
Press or . (Recording will also stop when you disconnect.)

Voice and Call Recording Options

2. Select a voice memo and press Options (right softkey).
3. Select an option and press MENU.
   - Play to play selected voice memos or all voice memos.
   - This to play the selected memo.
   - Multiple to play selected memos.
   - All to play all memos.

Note Only the other party’s voice is recorded during this process.
Speaker On or Speaker Off to activate or deactivate the speakerphone mode.

Edit Title to edit the title of a voice memo.

Properties to display information about a voice memo.

Type Filter to display only voice memos or only call memos.

Sort by to sort voice memos by time recorded, name, or file size.

Delete to delete either selected memos or all memos.

Deleting Voice and Call Recordings

To delete an individual recording:
1. Press \[ Tools \] > Voice Memo > List.
2. Select the memo you want to delete and press Options (right softkey) > Delete > This > Yes (left softkey).

To delete all recordings:
1. Press \[ Tools \] > Voice Memo > List.
2. Press Options (right softkey) > Delete > All > Yes (left softkey).

To delete multiple selected recordings:
1. Press \[ Tools \] > Voice Memo > List.
2. Press Options (right softkey) > Delete > Multiple.
3. Select the memos you want to delete and press Delete (left softkey) > Yes (left softkey).

Setting the Recording Mode

This feature allows you to match the sensitivity of the microphone to the type of recording you are making.

2. Select an option and press .
   - Dictation to record a single voice.
   - Conference to record multiple voices.
Setting Up Screen Call

You can screen incoming calls by using a recorded announcement, either a prerecorded one or one that you record. You can also record the caller’s message.

Activating Screen Call

To start Screen Call when you have an incoming call:

- When the phone rings or vibrates, press Options (right softkey) > Screen Call.

Tip

While the caller’s message is being recorded, press TALK to answer the call, or press END to stop recording and disconnect the call.

To screen calls automatically:

1. Press > Tools > Voice Memo > Screen Call > Auto.
2. Select On.
3. Set the answer delay.
4. Press OK (left softkey). (The icon is displayed on the screen.)

Selecting an Announcement for Screen Call

1. Press > Tools > Voice Memo > Screen Call > Announcement.
2. Select Pre-Recorded or Custom.

Recording Your Name for a Prerecorded Announcement

You can use a prerecorded announcement with or without your name. If you record your name, your phone adds it to the prerecorded announcement that you are not available to answer calls.

1. Press > Tools > Voice Memo > Screen Call > Announcement.
2. Highlight Pre-Recorded and press Edit (right softkey) > Record Name.
3. Press to start the first recording. (Press to stop recording. The maximum recording time is 12 seconds.)
4. After the first recording, press again to start the second recording.
5. Press to stop recording.
Recording a Customized Announcement

1. Press \( \text{Tools} \) > Voice Memo > Screen Call > Announcement.
2. Highlight Custom and press Edit (right softkey) > Record.
3. Press \( \text{MEMO} \) to start the first recording. (Press \( \text{MEMO} \) to stop recording. The maximum recording time is 12 seconds.)
4. After the first recording, press again to start the second recording.
5. Press \( \text{MEMO} \) to stop recording.

Reviewing an Announcement

1. Press \( \text{Tools} \) > Voice Memo > Screen Call > Announcement.
2. Select Pre-Recorded or Custom, and press Edit (right softkey) > Play or Play:Speaker.

Deleting an Announcement

1. Press \( \text{Tools} \) > Voice Memo > Screen Call > Announcement.
2. Select Pre-Recorded or Custom, and press Edit (right softkey).
3. Select Delete Name or Delete. (A confirmation will be displayed.)
4. Press Yes (left softkey).
Section 2I

Camera

- Taking Pictures (page 85)
- Storing Pictures (page 89)
- Sending Pictures (page 90)
- Managing Pictures (page 92)

Your phone’s built-in camera gives you the ability to take full-color digital pictures, view your pictures using the phone’s display, and instantly send them to family and friends. It’s fun and as easy to use as a traditional point-and-click camera: just take a picture, view it on your phone’s display, and send it from your phone to up to 25 people.

Taking Pictures

Taking pictures with your phone’s built-in camera is as simple as choosing a subject, pointing the lens, and pressing a key. You can activate the phone’s camera mode whether the phone is open or closed.

To take a picture with the phone open:

1. Press and hold or the side camera key to activate camera mode. (Additional camera options are available through the camera mode Options menu. See “Camera Mode Options” on page 86.)

   Tip
   To activate camera mode, you can also press MENU > Pictures > Camera.

2. Using the phone’s Main Screen as a viewfinder, aim the camera lens at your subject.

3. Press or Capture [left softkey], , or the side camera key) until the shutter sounds. (The picture will automatically be saved in the In Phone folder.)

   ■ To return to camera mode to take another picture, press or BACK.
4. Press **Options** (right softkey) for more options:
   - **Take Picture** to return to camera mode to take another picture.
   - **Send Media** to send your picture. (See page 91.)
   - **Upload** to upload the picture you just took to the picture messaging Web site (www.plspictures.com).
   - **Review Media** to go to the **In Phone** folder to review your saved pictures.
   - **Set as** to assign the picture. Select an option and press .
   - **Delete** to delete the picture you just took.
   - **Details/Edit** to edit your picture or display details relating to your pictures.

To take a picture with the phone closed:

1. Press and hold the side camera key to activate the camera mode.
2. Point the camera lens at your subject.
3. Press the side camera key to take the picture.

**Camera Mode Options**

When the phone is open and in camera mode, press **Options** (right softkey) to display additional camera options:

- **Picture Mode** to select a picture mode from **Normal**, **Beach/Snow**, **Scenery**, **Night/Dark** or **Soft Focus**.
- **Zoom** to zoom in on a subject. (See “Using the Zoom” on page 88.)
- **Self-Timer** to activate the camera’s timer. (See “Setting the Self-Timer” on page 87.)
- **Fun Tools** to select an option from the following:
  - **Multiple Shots** to take multiple shots. (See “Taking Multiple Shots” on page 87.)
  - **Fun Frames** to select your favorite fun picture frame to decorate your picture.
  - **Color Tone** to select a wide variety of color tones for the picture.
To cancel the self-timer after it has started:

- Press Cancel (right softkey).

**Note**
While the self-timer is active, all keys are disabled except END, BACK, and Cancel (right softkey).

### Taking Multiple Shots

This feature allows you to take up to nine continuous shots in sequence. When you take multiple shots, the icon will be displayed in the viewfinder.

**Note**
The number of multiple shots that can be taken depends on the resolution settings.

1. From camera mode, press Options (right softkey) > Fun Tools > Multiple Shots.
2. Select the number of shots and press .
3. Select the duration of the interval between shots (Normal or Fast) and press .
4. Press to take the pictures. (The Multiple Shots folder will be displayed with up to four thumbnail pictures per screen.)

---

**Setting the Self-Timer**

**To activate the self-timer:**

1. From camera mode, press Options (right softkey) > Self-Timer.
2. Highlight the length of delay you want the timer to use (10 Seconds or 5 Seconds) and press .
3. Press Start (left softkey) when you are ready to start the timer. ( appears on the upper right portion of the Main Screen during the self-timer countdown.)
4. Get ready for the picture. (When the timer is down to three seconds, the self-timer icon will turn red and the phone will begin to beep.)

---

**Image Controls** to select an option from Brightness or White Balance.

**Camera Settings** to select your settings. (See “Selecting Camera Settings” on page 88 for details.)

**Review Media** to go to the In Phone folder to review your saved pictures.

**Key Guidance** to indicate the key functions in camera mode.

**User Settings** to select your favorite setting. (See “Setting Your Favorite Mode” on page 88.)
5. Press Options (right softkey) to display picture options, or press \(\text{\textbullet}\) to return to Camera mode to take another picture.

**Using the Zoom**

This feature allows you to zoom in on an object when you take a picture. You can adjust the zoom from 1x to 16x.

1. From camera mode, press the navigation key right or left, or the volume key up or down to adjust the zoom. (The gauge bar appears.)
2. Press \(\text{\textbullet}\) to take the picture.

**Setting Your Favorite Mode**

With your phone, you can customize various camera settings. This feature allows you to save your favorite setting.

1. From camera mode, select your favorite setting. (See “Camera Mode Options” on page 86 and “Selecting Camera Settings” on this page.)
2. Press Options (right softkey) > User Settings.
3. Select an unassigned number and press Add (right softkey) > Yes (left softkey).
4. Enter a title and press \(\text{\textbullet}\).

**Selecting Camera Settings**

1. From camera mode, press Options (right softkey) > CameraSettings.
2. Select an option and press \(\text{\textbullet}\).
   - Resolution to select a picture’s file size (High-480x640, Med-240x320, or Low-120x160).
   - Quality to select the picture quality setting (Fine, Normal, or Economy).
   - Shutter Sound to select a shutter sound (Default, Say “Cheese,” “Ready,” or Off).
   - Status Bar to switch the status bar display on or off.
Storing Pictures

Your phone’s picture and storage area is called **My Albums**. There are two types of folders in **My Albums**:  
- **In Phone** (see below)  
- **Online Albums** (see page 93)

Copies of pictures can also be saved in the **Assigned Media** folder (see page 90).

### In Phone Folder

Your phone’s internal storage area is called the In Phone folder. From the In Phone folder, you can view all the pictures stored there, send items to the picture messaging Web site ([www.plspictures.com](http://www.plspictures.com)), delete files, and access additional options.

To review your pictures saved in the In Phone folder:

1. Press ** disparo > Pictures > My Albums > In Phone**.  
   (Thumbnails will be displayed, up to four at a time.)
2. Use your navigation key to view and scroll through the pictures.
In Phone Folder Options

When you are viewing the In Phone folder, press Options (right softkey) to display the following options:

- **Send Media** to send your pictures. (See page 91 for details.)
- **Upload** to upload pictures from the In Phone folder to the picture messaging Web site (www.plspictures.com).
- **Set as** to assign the picture. Select an option and press .
- **Delete** to delete pictures.

**Note**: Deleting data will free up memory space to enable you to take more pictures.

- **Details/Edit** to edit your picture or display details relating to your pictures.
- **Slideshow** to view your pictures in slideshow mode.
- **Album List** to display the album list.
- **Camera Mode** to activate camera mode.

Assigned Media Folder

When you assign a picture, a copy will be saved in the Assigned Media folder. The folder allows you to store copies of pictures on your phone and to assign pictures to various phone tasks.

To save a picture to the Assigned Media folder:

1. From the In Phone folder (see “In Phone Folder” on page 89), select a picture you wish to save to the Assigned Media folder and press .
2. Press Options (right softkey) > Set as.
3. Select an option and press in preview screen. (A copy of the picture will automatically be saved to the Assigned Media folder.)

To view pictures stored in the Assigned Media folder:

1. Press > Tools > Assign. Media. (Thumbnails will be displayed, up to four at a time.)
2. Use your navigation key to view and scroll.

Sending Pictures

Once you’ve taken a picture, you can use the messaging capabilities of your phone to instantly share your picture with family and friends. You can send pictures to up to 25 people at a time using their email addresses or their phone numbers.
Registering Your Picture Messaging Account

The first time you use any of the picture management options involving the picture messaging Web site you will need to register your picture messaging account and establish a password through your phone. This password will also allow you to sign in to the picture messaging Web site at www.plspictures.com to access and manage your uploaded pictures and albums.

1. Press \( \text{Menu} \) > Pictures > My Albums > Online Albums.

Note: If your service plan does not include Picture Mail, you will first be prompted to subscribe to the service for an additional monthly charge.

2. Enter a password for your picture messaging account and press \( \text{Menu} \). (You will be prompted to confirm your password.)

3. Please wait while the system creates your account.

Tip: Write down your Picture Mail password in a secure place.

Once you have received confirmation that your account has been successfully registered, you can upload and share pictures and access the Picture Mail Web site.

Sending Pictures From the In Phone Folder

1. Press \( \text{Menu} \) > Pictures > My Albums > In Phone.

2. Highlight a picture you wish to send and press \( \text{Menu} \). (The check box in the lower right corner will be marked. You can select multiple pictures.)

3. Press Options (right softkey) > Send Media. (You will see a message on the display.)

4. Follow the step 2 of “Composing SMS Text Messages” on page 108.

5. If you wish to include a text message, scroll to Text, and then enter your message.

6. If you wish to include a voice message, scroll to Audio and press Record (right softkey) to record. (Maximum recording time is 10 seconds.)

7. To set the priority, scroll to Priority, and then select High, Normal, or Low.

8. Confirm the recipients, message, voice message, and picture. (You may also select additional options by pressing the right softkey. Follow the onscreen instructions to add available options.)

9. Press the appropriate softkey to send the pictures.
Sending Pictures From the Messaging Menu

You can also send pictures from your phone’s Messaging menu.

1. Press \( \text{Menu} \) > Messaging > Send Message > Picture Msg.
2. Follow the step 2 of “Composing SMS Text Messages” on page 108.
3. Select In Phone or Online Albums.
4. Use the navigation key to select the picture you wish to send and press \( \text{Menu} \). (You can select multiple pictures.)
5. Press Next (left softkey). To finish and send the pictures, follow steps 5-9 in “Sending Pictures From the In Phone Folder” on page 91.

Tip

To take and send a new picture from Messaging, select Take Picture during step 3 above. Then take the new picture and follow step 5 above.

Managing Pictures

Using the Picture Messaging Web Site

Once you have uploaded pictures from your phone to your online picture messaging account at www.plspictures.com (see “Uploading Pictures” on page 93), you can use your personal computer to manage your pictures. From the picture messaging Web site, you can share pictures, edit album titles, add captions, and organize images. You can even send your pictures to be printed at participating retail locations.

You will also have access to picture management tools to improve and customize your pictures. You’ll be able to lighten, darken, crop, add antique effects, add comic bubbles and cartoon effects, and use other features to transform your pictures.

To access the picture messaging Web site:

1. From your computer’s Internet connection, go to www.plspictures.com.
2. Enter your phone number and picture messaging password to register. (See “Registering Your Picture Messaging Account” on page 91.)
Uploading Pictures

1. Press > Pictures > My Albums > In Phone.
2. Check the picture(s) you wish to upload, and then press Options (right softkey) > Upload.
3. Select This, Selected, or All.
4. Select “Uploads” Area or Other Albums.

Managing Online Pictures From Your Phone

You can use your phone to manage, edit, or share pictures you have uploaded to the picture messaging Web site.

1. Press > Pictures > My Albums > Online Albums.
2. Highlight an album title and press to display thumbnail images.
3. Use your navigation key to select a picture.
4. Press Options (right softkey) to display your online picture options.
   - Send Media to send your picture.
   - Set as to assign the picture.
   - Save to Phone to download the pictures to the In Phone folder.
   - Delete to delete pictures saved in the current album (or Uploads folder).
   - Copy/Move to copy or move pictures to a selected album.
   - Details/Edit to edit your pictures or display details relating to your pictures.
   - Media Filter to filter only pictures or to display all media files.
   - Album List to display the album list.

Tip
If only the “Uploads” folder exists, an album list is not displayed and thumbnail images in the Uploads folder are displayed.
To switch a selected picture from thumbnail view to expand view mode, press Expand (left softkey).

Note
The online picture options may vary depending on the item you select.
Downloading Your Online Pictures

From your online albums display at www.plspictures.com, you can select pictures to download to your phone’s In Phone folder.

1. From the online pictures display, select the pictures you wish to download.
2. Press Options (right softkey) > Save to Phone.

To access your Online Albums options from your phone:

1. Press > Pictures > My Albums > Online Albums.
2. Use your navigation key to highlight an album (or Uploads folder).
3. Press Options (right softkey) to display your online album options.

- **Edit/Delete** to select an option from the following:
  - **Delete Album** to delete the selected album.
  - **Rename Album** to rename the selected album.
  - **Album Info** to display detailed information about the album.

- **Create Album** to create a new album. Enter a new album name and press **Save** (left softkey).

**Note** The Uploads folder cannot be erased or renamed.
Bluetooth

Turning Bluetooth On and Off

By default, your phone’s Bluetooth feature is turned off. Turning Bluetooth on makes your phone “available” to other in-range Bluetooth devices. To make your phone visible to other devices, you must also set your phone’s visibility to other than Hidden. (See page 97.)

2. Select On to enable Bluetooth. Select Off to disable Bluetooth.

Note: Enabling the Bluetooth settings affects the battery’s talk and standby times.

Your phone features built-in Bluetooth® technology, allowing you to share information more easily than ever before. Bluetooth is a short-range communications technology that allows you to connect wirelessly to a number of Bluetooth devices, such as headsets and hands-free car kits, and Bluetooth-enabled handhelds, computers, and wireless phones. The Bluetooth communication range is usually up to approximately 30 feet.
Bluetooth Status Indicators

The following icons show your Bluetooth connection status at a glance:

- Bluetooth feature is enabled (blue icon).
- Your phone is connected to a Bluetooth device (green icon).
- Your phone is discoverable by another Bluetooth device.
- Your phone is communicating with a Bluetooth device.

Using the Bluetooth Menu

The Bluetooth menu allows you to use many functionality of your phone’s Bluetooth service.

- Press Menu > Tools > Bluetooth to display the Bluetooth menu.
  - Handsfree Pairing to find a Bluetooth headset or hands-free device and add it to your Trusted List.
  - Send Contact to send the Contacts entry saved on your phone to another Bluetooth device.
  - SendBiz Card to send your business card to another Bluetooth device.
  - Add to Trusted to add a Bluetooth device to your Trusted List. (You can specify the type of device to search for.)
  - Trusted List to display a list of trusted Bluetooth devices. Select <Add New> to find another Bluetooth device.

- Press Menu > Tools > Bluetooth > More... to set Block List. See “Block List” on page 97.

Find Me

If you are going to use a Bluetooth profile to pair with a Bluetooth device, you will need to allow the other device to initiate pairing with your phone.

1. Press Menu > Tools > Bluetooth > Find Me (left softkey).
2. Follow the onscreen prompts to enter your PIN and press Menu.
Block List

You can prevent other Bluetooth devices from connecting with your phone.

To add a device to the Block List:
1. Press > Tools > Bluetooth > More... > Block List.
2. Select <Add New>.
3. Select Search or View Trusted.
   - Search to search for devices to be added to the Block List.
   - View Trusted to remove a device from the Trusted List and add it to the Block List.
4. Highlight a device you want to add to the Block List and press Block (left softkey).

Block List Options

From the Block List, press Options (right softkey) to display the following options.
- Device Info to display the device’s information.
- Unblock to remove the device from the Block List.
- Edit Name to edit the name of the device.
- Sort by to sort the devices.
- Help to display the Block List help.

Using the Bluetooth Settings Menu

The Bluetooth Settings menu allows you to set up many of the characteristics of your phone’s Bluetooth service, including:

- Entering or changing the name your phone uses for Bluetooth communication.
- Setting your phone’s visibility (or “discoverability”) for other Bluetooth devices.
- Choosing a device for your Bluetooth calls.
- Displaying your phone’s Bluetooth information.

1. Press > Settings > Bluetooth.
2. Set your Bluetooth options.
   - Select On/Off to enable or disable Bluetooth.
   - Select Visibility > Always Visible, Visible 3 min., or Hidden to set your Bluetooth visibility.
   - Select Device Name to set a Bluetooth name for your phone.
   - Select Device Info to display your phone’s Bluetooth name, address, class and available services.
   - Select Trusted List to display a list of trusted Bluetooth devices.
Select **Voice Priority** to choose the default device you want to use for incoming and outgoing calls.

**Bluetooth Profiles**

All the Bluetooth settings you configure are stored in your phone’s Bluetooth user profile. Different profiles can be used for specific Bluetooth functions.

- **HSP: Headset Profile** – This profile functions as a wireless ear jack. When an incoming call is received, the ringer can be heard through the headset. While using your phone, you can use the headset instead of the phone by pushing a button on the headset, the same as inserting a jack into the phone. Increase or decrease the volume by using the volume key on the side of the phone.

- **HFP: Hands-Free Profile** – This profile functions as a wireless car-kit. Incoming calls ring to the hands-free headset or device. Calls can be received by pressing a button on the headset or device. For dialing, four functions are supported: recent call dial, voice dial, speed dial, and number dial. Increase or decrease the volume by using the volume key on the side of the phone.

- **DUN: Dial-Up Network Profile** – This profile functions as a wireless data cable, connecting a computer or PDA to a network through your phone.

- **OPP: Object Push Profile** – This profile uses the Generic Object Exchange profile services to send data objects between devices and can be used to exchange Contacts and business cards (vCard).

- **PBAP: Phone Book Access Profile** – This profile enables exchange of Contacts information between devices. It is typically used between a car kit and a mobile phone to allow the car kit to display the name of the incoming caller.

**Note**

To cycle between the phone’s earpiece, the speakerphone, and a Bluetooth headset during a call, press **SPEAKER**.
Pairing Bluetooth Devices

The Bluetooth pairing process allows you to establish trusted connections between your phone and another Bluetooth device. When devices are paired, a passcode (sometimes called a PIN) is shared between devices, allowing for fast, secure connections while bypassing the discovery and authentication process.

2. Select an option and press .
   - Handsfree Pairing to find a headset or hands-free device.
   - Add to Trusted to find a device per device type. Select a device type to be searched.
   - Trusted List to find all type device. Select <Add New> to start searching.
3. Select the device you wish to pair with and press .
4. Enter the PIN and press . (When the owner of the other device enters the same PIN, the pairing is complete.)
5. Edit the device name and press .

Using the Trusted List Options

Once you have created paired devices, several options are available from the Trusted List.

1. From the Trusted List, highlight a device.
2. Press Options (right softkey) to display the following options:
   - Connect or Disconnect to connect to or disconnect from the Bluetooth device (if applicable).
   - Send Item to send an item saved on your phone to another Bluetooth device (if applicable).
   - Edit Name to edit the name of the trusted device.
   - Auto-Accept to configure your phone’s accessibility to other Bluetooth devices. (See page 100.)
   - Device Info to display the trusted device’s information.
   - Sort by to sort the trusted devices.
   - Delete to delete the selected device from the list.
   - Delete All to delete all devices from the list.
   - Settings to display the Bluetooth settings menu. (See page 97.)
**Setting Automatic Pairing**

You can configure your phone’s accessibility to other Bluetooth devices.

1. From the Trusted List, highlight a device and press Options (right softkey) > Auto-Accept.

2. Select a setting and press 📷:
   - **On** to allow the Bluetooth device to initiate a connection without any confirmation.
   - **Off** to display a confirmation screen from which you can accept or deny a connection.

---

**Sending Data via Bluetooth**

You can send data saved on your phone to another Bluetooth device.

1. From the Trusted List, highlight the device and then press Options (right softkey) > Send Item.

2. Select an item (Business Card or Contacts) and press 📷.

3. Follow the onscreen instructions to select the item(s) to send.

4. Make sure the other device is ready to receive data, and then press Send (left softkey).

5. If necessary, enter the PIN and press 📷.

---

**Note**

Due to different specifications and features of other Bluetooth-compatible devices, display and operations may be different, and functions such as transfer or exchange may not be possible.
Section 3

Wireless Service
Using Voicemail

Before you use your voice mail, you need to set it up. See “Setting Up Your Voicemail” on page 3.

Note

Voicemail Passcode
If you are concerned about unauthorized access to your voicemail account, it is recommended that you enable your voicemail passcode. (Do not activate One-Touch Message Access.)

New Voicemail Message Alerts

When you receive a new voice message, your phone alerts you and prompts you to call your voicemail by:

- Displaying a message on the screen.
- Sounding the assigned ringer type.
- The LED blinking red.
- Displaying at the top of your screen.

To call your voicemail:

- Press TALK.
To display your Missed Log:

- Press \( \text{MENU} \) > Messaging > Voicemail > Details.

**Note**

When you are roaming off the home network, you may not receive notification of new voicemail messages. It is recommended that you periodically check your voicemail by dialing 1 + area code + your wireless phone number. When your voicemail answers, press (\#) and enter your passcode. You may be charged roaming rates when accessing voicemail while roaming off the home network.

Your phone accepts messages even when it is turned off. However, you are notified of new messages only when your phone is turned on and you are in a home network service area.

### Retrieving Your Voicemail Messages

You can review your messages directly from your wireless phone or from any other touch-tone phone. To dial from your wireless phone, you can either speed dial your voicemail or use the menu keys.

### Using One - Touch Message Access

- Press and hold \( \text{0} \). (Your phone will dial your voicemail box.)

### Using the Menu Keys on Your Phone to Access Your Messages

1. Press \( \text{MENU} \) > Messaging > Voicemail.
2. Press \( \text{TALK} \) to listen to your messages.

**Note**

You are charged for airtime minutes when you are accessing your voicemail from your wireless phone.

### Using Another Phone to Access Messages

1. Dial your wireless phone number.
2. When your voicemail answers, press \( \text{1} \) \( \text* \) \( \text{1} \).
3. Enter your passcode.

**Tip**

When you call into voicemail, you first hear the header information (date, time, and sender information) for the message. To skip directly to the message, press 4 during the header.
Voicemail Key Guide

Here’s a quick guide to your keypad functions while listening to voicemail messages. For further details and menu options, see “Voicemail Menu Key” on page 106.

- **Date/Time**: Send Reply
- **Del**: Send Reply
- **Replay**: Advance
- **Rewind**: Forward
- **Delete**: Call Back
- **Cancel**: Save
- **Help**: Skip

Using Expert Mode

Using the Expert Mode setting for your personal voicemail box helps you navigate through the voicemail system more quickly by shortening the voice prompts you hear at each level.

1. Press and hold 1 to access your voicemail. (If your voicemail box contains any new messages, press to access the main voicemail menu.)
2. Press 3 to change your Personal Options, following the system prompts.
4. Press 1 to turn Expert Mode on or off.

Setting Up Group Distribution Lists

Create up to 20 separate group lists, each with up to 20 customers.

1. Press and hold 1 to access your voicemail. (If your voicemail box contains any new messages, press to access the main voicemail menu.)
2. Press 3 to change your Personal Options, following the system prompts.
3. Press 1 for Settings.
4. Press \texttt{JNL 5} for Group Distribution Lists.

5. Follow the voice prompts to create, edit, rename, or delete group lists.

**Callback**

Return a call after listening to a message without disconnecting from voicemail.

- Press \texttt{TUV 8} after listening to a message. (Once the call is completed, you're returned to the voicemail main menu.)

**Voicemail-to-Voicemail Message**

Record and send a voice message to other voicemail users.

1. From the main voicemail menu, press \texttt{ABC 2} to send a message.

2. Follow the voice prompts to enter the phone number.

3. Follow the voice prompts to record and send your voice message.

**Voicemail-to-Voicemail Message Reply**

Reply to a voice message received from any other voicemail user.

1. After listening to a voice message, press \texttt{ABC 2}.

2. Follow the voice prompts to record and send your reply.

**Voicemail-to-Voicemail Message Forwarding**

Forward a voice message, except those marked “Private,” to other voicemail users.

1. After listening to a message, press \texttt{MNO 6}.

2. Follow the voice prompts to enter the phone number.

3. Follow the voice prompts to record your introduction and forward the voice message.

**Voicemail-to-Voicemail Receipt Request**

Receive confirmation that your voice message has been listened to when you send, forward messages to, or reply to messages from other users.

1. After you have recorded a message, press \texttt{ABC 2} to listen to the recorded message.

2. Press \texttt{JNL 5} for More Options.

3. Press \texttt{DEF 3} to mark receipt requested.

4. Press \texttt{CS 1} to send your voicemail message.
Extended Absence Greeting

When your phone is turned off or you are off the home network for an extended period, this greeting can be played instead of your normal personal greeting.

1. From the main voicemail menu, press 3 for Personal Options.
2. Press 2 for Greetings.
3. Press 3 to record an Extended Absence Greeting.

Clearing the Message Icon

Your phone may temporarily continue to display the message icon after you have checked your voice and text messages.

1. Press * > Messaging > Voicemail > Reset Indic.
2. Press Yes (left softkey).

Voicemail Menu Key

Following the prompts on the voicemail system, you can use your keypad to navigate through the voicemail menu. The following list outlines your phone’s voicemail menu structure.
Using SMS Text Messaging

With SMS Text Messaging, you can use other people’s phone numbers to send instant text messages from your phone to their messaging-ready phones—and they can send messages to you. When you receive a new message, it will automatically display on your phone’s screen.

In addition, SMS Text Messaging includes a variety of preset messages, such as “Can’t talk right now. Send me a message.” that make composing messages fast and easy. Use your phone to customize your own preset messages (up to 50 characters).

Accessing SMS Text Messages

- When you receive a text message, it will be displayed automatically on your phone’s screen. Use your navigation key to scroll down and view the entire message.

Tip
If you have two or more notifications, the Missed Alert list will appear. Select a message in the list and press View (left softkey) to view the message.

To reply to an SMS Text message:

1. While the message is open, press Reply (left softkey).
   - or –
   Highlight the message in the Inbox, and press Options (right softkey) > Reply With > Text Message.

2. Follow the steps 3-5 of “Composing SMS Text Messages” shown below.
Composing SMS Text Messages

1. Press > Messaging > Send Message > Text Message. Recent List is displayed.
2. Select the recipient from the Recent List and press .
   - Select Go to Contacts to select a recipient from your Contacts. Select a Contacts entry and press .
   - Press Group (left softkey) to select multiple recipients. After selecting recipients, press Continue (left softkey) to proceed.
3. Compose a message.
   - Press Mode (right softkey) to change a text input mode.
4. Press Options to select additional options.
5. Review your message and press Send (left softkey).

   Tip You can also press New Addr. (right softkey) to enter a new address.

Using Preset Messages

Preset messages make sending text messages to your friends, family, and coworkers easier than ever.

1. Press > Settings > Messaging > Preset Msgs.
2. Highlight a message you wish to send and press Options (right softkey) > Send Text.
3. Follow steps 2–5 in “Composing SMS Text Messages” on this page.

Using Caller ID

Caller ID allows people to identify a caller before answering the phone by displaying the number of the incoming call. If you do not want your number displayed when you make a call, follow these steps.

1. Press .
2. Enter the number you want to call.
3. Press TALK  

To permanently block your number, call your service provider.
Responding to Call Waiting

When you’re on a call, Call Waiting alerts you to incoming calls by sounding beeps. Your phone’s screen informs you that another call is coming in and displays the caller’s phone number (if available).

To respond to an incoming call while you’re on a call:

► Press TALK. (This puts the first caller on hold and answers the second call.)

To switch back to the first caller:

► Press TALK again.

Tip
For those calls where you don’t want to be interrupted, you can temporarily disable Call Waiting by pressing *70 before placing your call. Call Waiting is automatically reactivated once you end the call.

Making a Three-Way Call

With Three-Way Calling, you can talk to two people at the same time. When using this feature, the normal airtime rates will be charged for each of the two calls.

1. Enter a number you wish to call and press TALK.

2. Once you have established the connection, press TALK again. (This puts the first caller on hold.)

3. Select Contacts, Recent History, or Enter Phone#.

4. Choose a number from your Contacts or Recent History, or enter it directly, and press TALK.

5. When you’re connected to the second party, press TALK or Join (right softkey) again to begin your three-way call.

If one of the people you called hangs up during your call, you and the remaining caller stay connected. If you initiated the call and are the first to hang up, all other callers are disconnected.
Using Call Forwarding

Call Forwarding lets you forward all your incoming calls to another phone number — even when your phone is turned off. You can continue to make calls from your phone when Call Forwarding is activated.

To activate Call Forwarding:

1. Press \text{\texttt{# 7 2}}.
2. Enter the area code and phone number to which your future calls should be forwarded.
3. Press \text{\texttt{TALK}}. (You will hear a tone to confirm the activation of Call Forwarding.)

To deactivate Call Forwarding:

1. Press \text{\texttt{# 7 2 + 0}}.
2. Press \text{\texttt{TALK}}. (You will see a message and hear a tone to confirm the deactivation.)

\textbf{Note}\hspace{1em}You may be charged a higher rate for calls you have forwarded.

Exploring the Web (page 118)

Data service offers easy and amazing data services you will really use. These features – including messaging, games, downloadable ringers and screen savers, and portable Web access – let you have fun, stay in touch, and stay informed no matter where you go on the network. This section introduces these advanced services and walks you through the necessary steps to start taking advantage of the data service.

Data Service Applications

Here is a brief list of the applications available through your phone. For more information, please contact your service provider.

Picture Messaging – Instantly shoot, share, and print sharp digital pictures with your phone.

Messaging – Send and receive email messages and instant messages, and participate in online chat discussions on your phone.

Games – Play exciting games with full-color graphics, sound, and vibration. Choose from hundreds of games to play anytime.

Ringers – Personalize your phone by downloading and assigning different ringers to numbers in your Contacts.

Screen Savers – Download unique images to use as screen savers, or make it easy to tell who’s calling by assigning specific images to numbers in your Contacts.

Web – Experience full-color graphic versions of popular Web sites from your phone.
Getting Started With Data Service

With your wireless phone and data service, you are ready to start enjoying the advantages of data service. This section will help you learn the basics of using your data service, including managing your user name, launching a data connection, and navigating the Web with your phone.

Your User Name

When you buy your phone and sign up for service, you’re automatically assigned a user name, which is typically based on your 10-digit wireless phone number.

When you use your data service, your user name is submitted to identify you to the network. The user name is also useful as an address for email, as a way to personalize Web services, and as an online virtual identity.

Your user name will be automatically programmed into your phone. You don’t have to enter it.

Finding Your User Name

If you aren’t sure what your user name is, you can easily find it on your phone.

Press \( \text{MENU} \) > Settings > Phone Info > Phone#/UserID.

Updating Your User Name

If you choose to change your user name and select a new one, you must then update the user name on your phone.

Press \( \text{MENU} \) > Settings > More... > Web > Update Profile.

(To cancel, press END before completing the update process.)

Launching a Data Connection

Press \( \text{MENU} \) > Web. (Your data service connection will start and the home page will be displayed.)

Note

If Net Guard is enabled and displayed (see page 113), press OK (left softkey) to continue and launch the Web.

While connecting, an animation will be displayed on the screen. If you had a previous data connection, you may not see the animation when you start the session again.
Net Guard

When you first connect to the Web, the Net Guard will be displayed to confirm that you want to connect. This feature helps you avoid accidental connections. You can disable the Net Guard in the future by selecting Always Auto-Connect when the Net Guard is displayed.

To change your Net Guard settings:

Press Menu (right softkey) > More... > Preferences > Launch Page and select Last Page.

When enabled, the Net Guard appears only once as long as you have not turned the phone off and on.

Data Connection Status and Indicators

Your phone displays the current status of your data connection through indicators at the top of the screen. The following symbols are used:

- Your data connection is active (data is being transferred); the transmit/receive symbol will blink to indicate data transmission. Incoming voice calls go directly to voicemail; outgoing voice calls can be made, but the data connection will terminate.

- Your data connection is dormant (no data is being sent or received). Though not currently active, when dormant the phone can restart an active connection quickly; voice calls can be made and received.

- Your phone is not currently able to access data service features.

If no indicator is displayed, your phone does not have a current data connection. To launch a connection, see “Launching a Data Connection” on page 112.

Tip: To change the default launch page to the last page you viewed, press Menu (right softkey) > More... > Preferences > Launch Page and select Last Page.
Navigating the Web

Navigating through menus and Web sites during a data session is easy once you’ve learned a few basics. Here are some tips for getting around:

Softkeys

During a data session, the bottom line of your phone’s display contains one or more softkeys. These keys are shortcut controls for navigating around the Web, and they correspond to the softkeys directly below the phone’s display screen.

To use softkeys:

- Press a softkey. (If an additional pop-up menu is displayed when you press the softkey, select the menu items using your keypad [if they’re numbered], or by highlighting the option and pressing OK.)

Tips

Depending on which Web sites you visit, the labels on the softkeys may change to indicate their function.

Selecting

Once you’ve learned how to use softkeys and scroll, you can start navigating the Web.

To select onscreen items:

- Use the navigation key to highlight an item, and then press the appropriate softkey (or press OK).

Scrolling

As with other parts of your phone’s menu, you’ll have to scroll up and down to see everything on some Web sites.

To scroll line by line through Web sites:

- Press the navigation key up or down.

To scroll page by page through Web sites:

- Press the volume key.
Links, which are displayed as underlined text, allow you to jump to Web pages, select special functions, or even place phone calls.

**To select links:**
> Highlight the link and press the appropriate softkey.

**Going Back**

**To go back one page:**
> Press **BACK** on your phone.

**Accessing Messaging**

You can send and receive email messages, instant messages, and text messages right from your phone. Messaging allows you to stay connected 24 hours a day anywhere on the home network.

**Accessing Email Providers**

With data service, you can use popular email services such as Yahoo! Mail, to keep in touch, even while you’re on the go.

1. From the home page, select **Messaging > Email**.
2. Select an email provider.

**Note**
For details on text messaging, see “Using SMS Text Messaging” on page 107. For details on picture messaging, see “Sending Pictures” on page 90.

**Going Home**

**To return to the home page from any other Web page:**
> Press and hold **BACK**.
> or –
> Press the right softkey > **Home**.

**Note**
The **BACK** key is also used for deleting text (like a BACKSPACE key) when you are entering text.
3. Use your keypad to enter the required sign-in information for the selected provider, such as user name, email address, or password, and select **Sign In**. (Your mailbox for the selected provider will be displayed.)

**Note** The information required to sign in will vary depending on the email provider you are accessing.

4. Follow the onscreen instructions to read, reply to, compose, send, and manage messages in your email account.

---

**Accessing Instant Messaging**

Data service also provides you with access to popular instant messaging (IM) clients, including AOL® Instant Messenger™ and Yahoo® Messenger.

1. From the home page, select **Messaging > Instant Messaging**.

2. Select an IM provider.

3. Use your keypad to enter the required sign-in information for the selected provider, such as user name or password, and select **Sign In**. (Your IM screen for the selected provider will be displayed.)

**Note** The information required to sign in will vary depending on the instant messaging provider you are accessing.

4. Follow the onscreen instructions to read, reply to, compose, send, and manage messages in your IM account.
Downloading Content

With data service, you have access to a dynamic variety of Premium Services content, such as downloadable Games, Ringers, Screen Savers, and other applications. (Additional charges may apply.) The basic steps required to access and download Premium Services content are outlined below.

Accessing the Download Menus

1. Press My Content.
2. Select the type of file you wish to download (Games, Ringers, Screensavers, or Applications), and then select Get New. (The browser will start and take you to the corresponding download menu.)

Selecting an Item to Download

You can search for available items to download in a number of ways:

- **Featured** displays a rotating selection of featured items.
- **Category** allows you to narrow your search to a general category, such as Country or Pop/Rock for Ringers or For the Ladies for Screen Savers. (There may be several pages of available content in a list. Select Next 9 to view additional items.)
- **Search** allows you to use your keypad to enter search criteria to locate an item. You may enter an entire word or title or perform a partial-word search.
**Downloading an Item**

Once you’ve selected an item you wish to download, highlight it and press \[\text{Menu} \] or press \text{Go} (left softkey). You will see a summary page for the item including its title, the vendor, the download details, the file size, and the cost. Links allow you to view the **License Details** page, which outlines the price, license type, and length of license for the download; and the **Terms of Use** page, which details the Premium Services Terms of Use and your responsibility for payment.

**To download a selected item:**

1. From the information page, select **Buy**. (The item will download automatically. When the **New Download** screen is displayed, the item has been successfully downloaded to your phone.)

2. Once the item has been successfully downloaded and the completed screen appears, select an option to assign the ringer or screen saver, run the application, play the game, etc.

**Note**

If you have not previously purchased an item, you will be prompted to create your purchasing profile.

**Exploring the Web**

With Web access on your phone, you can browse full-color graphic versions of your favorite Web sites, making it easier than ever to stay informed while on the go. Follow sports scores, breaking news and weather, and shop on your phone anywhere on the home network.

In addition to the features already covered in this section, the home page offers access to these colorful, graphically rich Web categories, as well as useful management options. Many sites are available under more than one menu – choose the one that’s most convenient for you.

**Using the Browser Menu**

Navigating the Web from your phone using the home page is easy once you get the hang of it. For details on how to navigate the Web, select menu items, and more, see “Navigating the Web” on page 114.

Although the home page offers a broad and convenient array of sites and services for you to browse, not all sites are represented, and certain functions, such as going directly to specific Web sites, are not available. For these and other functions, you will need to use the browser menu. The browser
menu offers additional options to expand your use of the Web on your phone.

**Opening the Browser Menu**

The browser menu may be opened anytime you have an active data service session, from any page you are viewing.

**To open the browser menu:**

- Press the right softkey. (The browser menu will be displayed.)

Options available under the browser menu include:

- **Home.** Returns the browser to the home page.
- **Forward.** Returns you to a previously viewed page.
- **Mark this page.** Allows you to bookmark the current site.
- **View Bookmarks.** Allows you to access and manage your bookmarks.
- **Search.** Launches a Web search.
- **Send page.** Allows you to send a URL via SMS.
- **Go to URL.** Allows you to navigate directly to a Web site by entering its URL.
- **History.** Keeps a list of links to your most recently visited sites. To navigate to a site, highlight it and press .
- **Refresh this page.** Reloads the current Web page.
- **More....** Displays additional options.
  - **Show URL.** Displays the URL (Web site address) of the site you’re currently viewing.
  - **Restart Browser.** Refreshes the current browser session.
  - **Script Log.** Lets you display the script log.
  - **About Browser.** Allows you to display information about your browser.
  - **Preferences.** Lets you configure and manage your browser settings.
Creating a Bookmark

Bookmarks allow you to store the address of your favorite Web sites for easy access at a later time.

1. Go to the Web page you want to mark.
2. Press the right softkey to open the browser menu.
3. Select **Mark this page > Save** (left softkey).

**Notes**

- Bookmarks do not store the page’s contents, just its address.
- Some pages cannot be bookmarked. Whether a particular Web page may be marked is controlled by its creator.

Accessing a Bookmark

1. Press the right softkey to open the browser menu.
2. Select **View Bookmarks**.
3. Select a the bookmark and press **Home** (or press the number corresponding to the bookmark you wish to access).

Deleting a Bookmark

1. Press the right softkey to open the browser menu.
2. Select **View Bookmarks**.
3. Highlight the bookmark you’d like to delete and press the right softkey.
4. Select **Delete**. (A confirmation screen will be displayed.)
5. Press **Yes** (right softkey) to remove the bookmark.

Going to a Specific Web Site

1. Press the right softkey to open the browser menu.
2. Select **Go to URL... > Input Address**.
3. Use your keypad to enter the URL of the Web site you wish to go to and press **End**.

**Note**

Not all Web sites are viewable on your phone.

Reloading a Web Page

1. Press the right softkey to open the browser menu.
2. Select **Refresh this page**. (The browser will reload the current Web page.)
Sending a Web Page

This feature allows you to send a URL you’re viewing through SMS Text Messaging.

1. Press the right softkey to open the browser menu.
2. Select **Send page**.
3. To complete and send a Web page, follow steps 2–5 in “Composing SMS Text Messages” on page 108.

Restarting the Web Browser

If the Web browser seems to be malfunctioning or stops responding, you can usually fix the problem by simply restarting the browser.

1. Press the right softkey to open the browser menu.
2. Select **More... > Restart Browser**.
Section 4

Safety & Warranty Information
Section 4A

Important Safety Information

- General Precautions (page 124)
- Maintaining Safe Use of and Access to Your Phone (page 125)
- Using Your Phone With a Hearing Aid Device (page 126)
- Caring for the Battery (page 127)
- Radio Frequency (RF) Energy (page 128)
- Owner’s Record (page 130)
- Phone Guide Proprietary Notice (page 131)

This phone guide contains important operational and safety information that will help you safely use your phone. Failure to read and follow the information provided in this phone guide may result in serious bodily injury, death, or property damage.

General Precautions

There are several simple guidelines to operating your phone properly and maintaining safe, satisfactory service.

- To maximize performance, do not touch the lower back portion of your phone where the internal antenna is located while using the phone.
- Speak directly into the mouthpiece.
- Avoid exposing your phone and accessories to rain or liquid spills. If your phone does get wet, immediately turn the power off and remove the battery.
- Do not expose your phone to direct sunlight for extended periods of time (such as on the dashboard of a car).
- Although your phone is quite sturdy, it is a complex piece of equipment and can be broken. Avoid dropping, hitting, bending, or sitting on it.
- Any changes or modifications to your phone not expressly approved in this document could void your warranty for this equipment and void your authority to operate this equipment.

Note: For the best care of your phone, only authorized personnel should service your phone and accessories. Failure to do so may be dangerous and void your warranty.
Maintaining Safe Use of and Access to Your Phone

Do Not Rely on Your Phone for Emergency Calls
Mobile phones operate using radio signals, which cannot guarantee connection in all conditions. Therefore you should never rely solely upon any mobile phone for essential communication (e.g., medical emergencies). Emergency calls may not be possible on all cellular networks or when certain network services or mobile phone features are in use. Check with your local service provider for details.

Using Your Phone While Driving
Talking on your phone while driving (or operating the phone without a hands-free device) is prohibited in some jurisdictions. Laws vary as to specific restrictions. Remember that safety always comes first.

Following Safety Guidelines
To operate your phone safely and efficiently, always follow any special regulations in a given area. Turn your phone off in areas where use is forbidden or when it may cause interference or danger.

Using Your Phone Near Other Electronic Devices
Most modern electronic equipment is shielded from radio frequency (RF) signals. However, RF signals from wireless phones may affect inadequately shielded electronic equipment.

RF signals may affect improperly installed or inadequately shielded electronic operating systems or entertainment systems in motor vehicles. Check with the manufacturer or their representative to determine if these systems are adequately shielded from external RF signals. Also check with the manufacturer regarding any equipment that has been added to your vehicle.

Consult the manufacturer of any personal medical devices, such as pacemakers and hearing aids, to determine if they are adequately shielded from external RF signals.

Note Always turn off the phone in healthcare facilities, and request permission before using the phone near medical equipment.

Turning Off Your Phone Before Flying
Turn off your phone before boarding any aircraft. To prevent possible interference with aircraft systems, the U.S. Federal Aviation Administration (FAA) regulations require you to have permission from a crew member to use your phone while the plane is on the ground. To prevent any risk of interference, FCC regulations prohibit using your phone while the plane is in the air.

Turning Off Your Phone in Dangerous Areas
To avoid interfering with blasting operations, turn your phone off when in a blasting area or in other areas with signs indicating two-way radios should be turned off. Construction crews often use remote-control RF devices to set off explosives.

Turn your phone off when you’re in any area that has a potentially explosive atmosphere. Although it’s rare, your phone and accessories could generate sparks. Sparks can cause an explosion or fire, resulting in bodily injury or even death. These areas are often, but not always, clearly marked. They include:

- Fueling areas such as gas stations.
Below deck on boats.
Fuel or chemical transfer or storage facilities.
Areas where the air contains chemicals or particles such as grain, dust, or metal powders.
Any other area where you would normally be advised to turn off your vehicle's engine.

- Below deck on boats.
- Fuel or chemical transfer or storage facilities.
- Areas where the air contains chemicals or particles such as grain, dust, or metal powders.
- Any other area where you would normally be advised to turn off your vehicle's engine.

Restricting Children’s Access to Your Phone
Your phone is not a toy. Do not allow children to play with it as they could hurt themselves and others, damage the phone or make calls that increase your invoice.

Using Your Phone With a Hearing Aid Device
Your phone has been tested for hearing aid device compatibility. When some wireless phones are used with certain hearing devices (including hearing aids and cochlear implants), users may detect a noise which can interfere with the effectiveness of the hearing device.

Some hearing devices are more immune than others to this interference noise, and phones also vary in the amount of interference noise they may generate.

ANSI standard C63.19 was developed to provide a standardized means of measuring both wireless phone and hearing devices to determine usability rating categories for both.

Ratings have been developed for mobile phones to assist hearing device users find phones that may be compatible with their hearing device. Not all phones have been rated for compatibility with hearing devices. Phones that have been rated have a label located on the box. Your KATANA® LX by SANYO® has M4 and T4 ratings.

These ratings are not guarantees. Results will vary depending on the user's hearing device and individual type and degree of hearing loss. If a hearing device is particularly vulnerable to interference noise; even a phone with a higher rating may still cause unacceptable noise levels in the hearing device. Trying out the phone with your hearing device is the best way to evaluate it for your personal needs.

M-Ratings: Phones rated M3 or M4 meet FCC requirements for hearing aid compatibility and are likely to generate less interference to hearing devices than unrated phones. (M4 is the better/higher of the two ratings.)

T-Ratings: Phones rated T3 or T4 meet FCC requirements and are likely to be more usable with a hearing device’s telecoil (“T Switch” or “Telephone Switch”) than unrated phones. (T4 is the better/higher of the two ratings. Note that not all hearing devices have telecoils in them.)

Hearing aid devices may also be measured for immunity to interference noise from wireless phones and should have ratings similar to phones. Ask your hearing healthcare professional for the rating of your hearing aid. Add the rating of your hearing aid and your phone to determine probable usability:

- Any combined rating equal to or greater than six offers excellent use.
Any combined rating equal to five is considered normal use.

Any combined rating equal to four is considered usable.

Thus, if you pair an M3 hearing aid with an M3 phone, you will have a combined rating of six for “excellent use.” This is synonymous for T ratings.

It is further suggested that you experiment with multiple phones (even those not labeled M3/T3 or M4/T4) while in the store to find the one that works best with your hearing aid device. Should you experience interference or find the quality of service unsatisfactory after purchasing your phone, promptly return it to the store where purchased for exchange or refund. More information about hearing aid compatibility may be found at: www.fcc.gov, www.fda.gov, and www.accesswireless.org.

Getting the Best Hearing Device Experience With Your Phone

To further minimize interference:

- Set the phone’s display and keypad backlight settings to ensure the minimum time interval:

  To change the Backlight setting:
  1. Press > Settings > Display > Main Screen > Backlight.
  2. Select the minimum time interval setting and press .

- Position the phone so the internal antenna is farthest from your hearing aid.

Caring for the Battery

Protecting Your Battery

The guidelines listed below help you get the most out of your battery's performance.

- Recently there have been some public reports of wireless phone batteries overheating, catching fire or exploding. It appears that many, if not all, of these reports involve counterfeit or inexpensive, aftermarket-brand batteries with unknown or questionable manufacturing standards. The manufacturer is not aware of similar problems with manufacturer phones resulting from the proper use of batteries and accessories approved by the manufacturer. Use only manufacturer-approved batteries and accessories found through your phone’s manufacturer. Buying the right batteries and accessories is the best way to ensure they’re genuine and safe.

- In order to avoid damage, charge the battery only in temperatures that range from 32° F to 113° F (0° C to 45° C).
Don’t use the battery charger in direct sunlight or in high humidity areas, such as the bathroom.

Never dispose of the battery by incineration.

Keep the metal contacts on top of the battery clean.

Don’t attempt to disassemble or short-circuit the battery.

The battery may need recharging if it has not been used for a long period of time.

It’s best to replace the battery when it no longer provides acceptable performance. It can be recharged hundreds of times before it needs replacing.

Don’t store the battery in high temperature areas for long periods of time. It’s best to follow these storage rules:

- Less than one month: -4° F to 140° F (-20° C to 60° C)
- More than one month: -4° F to 113° F (-20° C to 45° C)

Disposal of Lithium Ion (Li-Ion) Batteries
Do not handle a damaged or leaking Li-Ion battery as you can be burned.

For safe disposal options of your Li-Ion batteries, contact your nearest authorized service center.

Special Note: Be sure to dispose of your battery properly. In some areas, the disposal of batteries in household or business trash may be prohibited.

Radio Frequency (RF) Energy

Understanding How Your Phone Operates
Your phone is basically a radio transmitter and receiver. When it’s turned on, it receives and transmits radio frequency (RF) signals. When you use your phone, the system handling your call controls the power level. This power can range from 0.006 watt to 0.2 watt in digital mode.

Knowing Radio Frequency Safety
The design of your phone complies with updated NCRP standards described below.

In 1991–92, the Institute of Electrical and Electronics Engineers (IEEE) and the American National Standards Institute (ANSI) joined in updating ANSI’s 1982 standard for safety levels with respect to human exposure to RF signals. More than 120 scientists, engineers and physicians from universities, government health agencies and industries developed this updated standard after reviewing the available body of research. In 1993, the Federal Communications Commission (FCC) adopted this updated standard in a regulation. In August 1996, the FCC adopted hybrid standard consisting of the existing ANSI/IEEE standard and the guidelines published by the National Council of Radiation Protection and Measurements (NCRP).
Body-Worn Operation
To maintain compliance with FCC RF exposure guidelines, if you wear a handset on your body, use the supplied or approved carrying case, holster or other body-worn accessory. If you do not use a body-worn accessory, ensure the antenna is at least 1.5 centimeters from your body when transmitting. Use of non-manufacturer-approved accessories may violate FCC RF exposure guidelines.
For more information about RF exposure, visit the FCC Web site at www.fcc.gov.

Specific Absorption Rates (SAR) for Wireless Phones
The SAR is a value that corresponds to the relative amount of RF energy absorbed in the head of a user of a wireless handset.
The SAR value of a phone is the result of an extensive testing, measuring and calculation process. It does not represent how much RF the phone emits. All phone models are tested at their highest value in strict laboratory settings. But when in operation, the SAR of a phone can be substantially less than the level reported to the FCC. This is because of a variety of factors including its proximity to a base station antenna, phone design and other factors. What is important to remember is that each phone meets strict federal guidelines. Variations in SARs do not represent a variation in safety.
All phones must meet the federal standard, which incorporates a substantial margin of safety. As stated above, variations in SAR values between different model phones do not mean variations in safety. SAR values at or below the federal standard of 1.6 W/kg are considered safe for use by the public.

The highest reported SAR values of the KATANA® LX (PLS-3800) are:

**Cellular CDMA mode (Part 22):**
- Head: 0.530 W/kg; Body-worn: 0.598 W/kg
**PCS mode (Part 24):**
- Head: 0.783 W/kg; Body-worn: 0.796 W/kg

FCC Radio Frequency Emission
This phone meets the FCC Radio Frequency Emission Guidelines.
FCC ID number: AEZSCP-3800.
More information on the phone’s SAR can be found from the following FCC Web site: http://www.fcc.gov/oet/fccid.
FCC Notice

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient the direction of the internal antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Owner’s Record

The model number, regulatory number, and serial number are located on a nameplate inside the battery compartment. Record the serial number in the space provided below. This will be helpful if you need to contact us about your phone in the future.

Model: KATANA® LX by SANYO®

Serial No.:

Phone Guide template version 7B (December 2007)
Section 4B

Manufacturer’s Warranty

Your phone has been designed to provide you with reliable, worry-free service. If for any reason you have a problem with your equipment, please refer to the manufacturer’s warranty in this section.

For information regarding the terms and conditions of service for your phone, please contact your wireless service provider.

Manufacturer’s Limited Warranty

KYOCERA SANYO Telecom, Inc. ("KSTI") offers you, the original purchaser who has purchased the enclosed subscriber unit ("Product") only from an authorized dealer in the United States, a limited warranty that the Product, including accessories in the Product’s package, will be free from defects in material or workmanship as follows:

A. ONE (1) YEAR LIMITED WARRANTY: For a period of one (1) year from the date of original purchase, KSTI will, at its option, either repair or replace a defective Product (with new or rebuilt parts/replacements).

B. LIMITED WARRANTY ON REPAIRED/REPLACED PRODUCTS: For a period equal to the remainder of the limited warranty period on the original Product or, on warranty repairs which have been effected on Products for 90 days after the date of its repair or replacement, whichever is longer, KSTI will repair or replace (with new or rebuilt parts/replacements) defective parts or Products used in the repair or replacement of the original Product under the Limited Warranty on it.

Proof that the Product is within the warranty period in the form of a bill of sale or warranty repair document that includes the date of purchase, Product serial number and the authorized dealer’s name and address, must be presented to obtain warranty service. This limited warranty is not transferable to any third party, including but not limited to any subsequent purchaser or owner of the Product. Transfer or resale of a Product will automatically terminate warranty coverage with respect to it.
This limited warranty covers batteries only if battery capacity falls below 80% of rated capacity or the battery leaks. Also this limited warranty does not cover any battery if (i) the battery has been charged by a battery charger not specified or approved by KSTI for charging the battery, (ii) any of the seals on the battery are broken or show evidence of tampering, or (iii) the battery has been used in equipment other than the SANYO brand mobile phone for which it is specified.

This limited warranty does not cover and is void with respect to the following: (i) Products which have been improperly installed, repaired, maintained or modified (including the antenna); (ii) Products which have been subjected to misuse (including Products used in conjunction with hardware electrically or mechanically incompatible or Products used with software, accessories, goods or ancillary or peripheral equipment not supplied or expressly authorized by KSTI for use), abuse, accident, physical damage, abnormal use or operation, improper handling or storage, neglect, exposure to fire, water or excessive moisture or dampness or extreme changes in climate or temperature, (iii) Products operated outside published maximum ratings; (iv) cosmetic damage; (v) Products on which warranty stickers or Product serial numbers have been removed, altered, or rendered illegible; (vi) customer instruction; (vii) cost of installation, set up, removal or reinstallation; (viii) signal reception problems (unless caused by defect in material or workmanship); (ix) damage the result of fire, flood, acts of God or other acts which are not the fault of KSTI and which the Product is not specified to tolerate, including damage caused by mishandling and blown fuses; (x) consumables (such as memory cards, fuses, etc.); or (xi) any Products which have been opened, repaired, modified or altered by anyone other than KSTI or a KSTI authorized service center.

This warranty is valid only in the United States.

REPAIR OR REPLACEMENT, AS HEREBINABOVE PROVIDED, IS YOUR SOLE AND EXCLUSIVE REMEDY FOR BREACH OF THE LIMITED WARRANTY. KSTI SHALL HAVE NO LIABILITY FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES, INCLUDING, BUT NOT LIMITED TO LOSS OF PROFITS, LOST SALES, LOSS OF DATA, LOSS OF USE OF THE PRODUCT, OR ANTICIPATED PROFITS ARISING OUT OF USE OR INABILITY TO USE ANY PRODUCT (FOR EXAMPLE, WASTED AIRTIME CHARGES DUE TO THE MALFUNCTION OF A PRODUCT). THIS WARRANTY DOES NOT COVER PRODUCTS SOLD “AS IS” OR “WITH ALL FAULTS”. KSTI MAKES NO OTHER EXPRESS WARRANTY WITH RESPECT TO THE PRODUCTS. THE DURATION OF IMPLIED WARRANTIES, INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE IS LIMITED TO THE DURATION OF THIS EXPRESS WARRANTY.

Some States do not allow the exclusion or limitation of incidental or consequential damages, or allow limitations on how long an implied warranty lasts, so the above limitations or exclusions may not apply to you.

This limited warranty gives you specific legal rights, and you may have other rights which vary from State to State.

To obtain warranty service, contact KYOCERA SANYO Telecom, Inc.
