

VPAT™

Voluntary Product Accessibility Template®

Version 1.3

The purpose of the **Voluntary Product Accessibility Template**, or **VPAT™**, is to assist Federal contracting officials and other buyers in making preliminary assessments regarding the availability of commercial “Electronic and Information Technology” products and services with features that support accessibility. It is assumed and recommended that offerers will provide additional contact information to facilitate more detailed inquiries.

The first table of the Template provides a summary view of the Section 508 Standards. The subsequent tables provide more detailed views of each subsection. There are three columns in each table. Column one of the Summary Table describes the subsections of subparts B and C of the Standards. The second column describes the supporting features of the product or refers you to the corresponding detailed table, e.g., “equivalent facilitation.” The third column contains any additional remarks and explanations regarding the product. In the subsequent tables, the first column contains the lettered paragraphs of the subsections. The second column describes the supporting features of the product with regard to that paragraph. The third column contains any additional remarks and explanations regarding the product.

Date: 1/22/2016

Name of Product: DuraForce XD

Section 1194.21 Software Applications and Operating Systems – Detail

VPAT™

Voluntary Product Accessibility Template®

Criteria	Supporting Features	Remarks and explanations
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Not Applicable: This product does not equip a keyboard.	
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and	Supported: Application will not disrupt or disable activated features of any	

<p>documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.</p>	<p>operating system that are identified as accessibility features.</p>	
<p>(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.</p>	<p>Supported: This product has a cursor to indicate where users enter characters.</p>	
<p>(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.</p>	<p>Partially Supported: - This product use gray color for disabled menus or buttons - For most icons, text are displayed by long-pressing them.</p>	
<p>(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.</p>	<p>Supported: All images used for controls or programmatic elements are consistent throughout this product.</p>	
<p>(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.</p>	<p>Supported: This product uses standard operating system functions to send textual information to operating system.</p>	
<p>(g) Applications shall not override user selected contrast and color</p>	<p>Supported:</p>	

<p>selections and other individual display attributes.</p>	<p>User can adjust display color selection in Settings menu.</p>	
<p>(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.</p>	<p>Supported: Users can adjust animation settings at "Settings > Developers options > Window animation scale, Transition animation scale, and Animator duration scale.</p>	
<p>(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.</p>	<p>Supported: This product uses not only color coding but also text prompt, sound prompt.</p>	
<p>(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.</p>	<p>Partially Supported: Color adjustment is supported. However, contrast setting is not supported.</p>	
<p>(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.</p>	<p>Supported: This handset avoids the frequencies between 2Hz and 55Hz in order to avoid LED Lighting flicker.</p>	
<p>(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.</p>	<p>Supported: All form elements are well labeled and they can be read out. Users can input by speech.</p>

**Section 1194.22 Web-based Internet
information and applications – Detail**

VPAT™

Voluntary Product Accessibility Template®

Criteria	Supporting Features	Remarks and explanations
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Not Applicable: This product is mobile handset.	
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Not Applicable: This product is mobile handset.	
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Not Applicable: This product is mobile handset.	
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Not Applicable: This product is mobile handset.	
(e) Redundant text links shall be provided for each active region of a server-side image map.	Not Applicable: This product is mobile handset.	
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	Not Applicable: This product is mobile handset.	
(g) Row and column headers shall be identified for data tables.	Not Applicable: This product is mobile handset.	

<p>(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.</p>	<p>Not Applicable: This product is mobile handset.</p>	
<p>(i) Frames shall be titled with text that facilitates frame identification and navigation</p>	<p>Not Applicable: This product is mobile handset.</p>	
<p>(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.</p>	<p>Not Applicable: This product is mobile handset.</p>	
<p>(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.</p>	<p>Not Applicable: This product is mobile handset.</p>	
<p>(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.</p>	<p>Not Applicable: This product is mobile handset.</p>	
<p>(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).</p>	<p>Not Applicable: This product is mobile handset.</p>	
<p>(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.</p>	<p>Not Applicable: This product is mobile handset.</p>	

(o) A method shall be provided that permits users to skip repetitive navigation links.	Not Applicable: This product is mobile handset.	
(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	Not Applicable: This product is mobile handset.	

Note to 1194.22: The Board interprets paragraphs (a) through (k) of this section as consistent with the following priority 1 Checkpoints of the Web Content Accessibility Guidelines 1.0 (WCAG 1.0) (May 5 1999) published by the Web Accessibility Initiative of the World Wide Web Consortium: Paragraph (a) - 1.1, (b) - 1.4, (c) - 2.1, (d) - 6.1, (e) - 1.2, (f) - 9.1, (g) - 5.1, (h) - 5.2, (i) - 12.1, (j) - 7.1, (k) - 11.4.

Section 1194.23 Telecommunications Products

– Detail

VPAT™

Voluntary Product Accessibility Template®

Criteria	Supporting Features	Remarks and explanations
(a) Telecommunications products or systems which provide a function allowing voice communication and which do not themselves provide a TTY functionality shall provide a standard non-acoustic connection point for TTYs. Microphones shall be capable of being turned on and off to allow the user to intermix speech with TTY use.	Supported: This product supports an industrial standard headset jack as a standard non-acoustic connection point for TTYs.	
(b) Telecommunications products which include voice communication functionality shall support all	Supported:	

<p>commonly used cross-manufacturer non-proprietary standard TTY signal protocols.</p>	<p>This product complies with TTY Standards (TSB-121). To confirm TTY connectability, the handset is tested with standard TTY devices during the development phase of the handset.</p> <p>*TSB-121: Cellular Subscriber Unit Interface for TDD (2001) - This TIA standard was developed by committee TR-45.1</p>	
<p>(c) Voice mail, auto-attendant, and interactive voice response telecommunications systems shall be usable by TTY users with their TTYs.</p>	<p>Supported: TTY users can use Voice mail, auto-attendant, and interactive voice response telecommunications systems with their TTYs.</p>	
<p>(d) Voice mail, messaging, auto-attendant, and interactive voice response telecommunications systems that require a response from a user within a time interval, shall give an alert when the time interval is about to run out, and shall provide sufficient time for the user to indicate more time is required.</p>	<p>Not Applicable: This item is dependent on AT&T service.</p>	
<p>(e) Where provided, caller identification and similar telecommunications functions shall also be available for users of TTYs, and for users who cannot see displays.</p>	<p>Supported: This product provides the caller ID information by voice so that the caller's name and/or number can be heard audibly by the user.</p>	

<p>(f) For transmitted voice signals, telecommunications products shall provide a gain adjustable up to a minimum of 20 dB. For incremental volume control, at least one intermediate step of 12 dB of gain shall be provided.</p>	<p>Not Supported:</p> <p>This product does not support this feature.</p>	
<p>(g) If the telecommunications product allows a user to adjust the receive volume, a function shall be provided to automatically reset the volume to the default level after every use.</p>	<p>Not Supported:</p> <p>This product keeps the volume level after every use. It keeps the latest adjusted volume level.</p>	
<p>(h) Where a telecommunications product delivers output by an audio transducer which is normally held up to the ear, a means for effective magnetic wireless coupling to hearing technologies shall be provided.</p>	<p>Supported:</p> <p>This product complies ANSI C63.19-2011.</p>	
<p>(i) Interference to hearing technologies (including hearing aids, cochlear implants, and assistive listening devices) shall be reduced to the lowest possible level that allows a user of hearing technologies to utilize the telecommunications product.</p>	<p>Supported:</p> <p>This product complies ANSI C63.19-2011.</p>	
<p>(j) Products that transmit or conduct information or communication, shall pass through cross-manufacturer, non-proprietary, industry-standard codes, translation protocols, formats or other information necessary to provide the information or communication in a usable format. Technologies which use encoding, signal compression, format transformation, or similar techniques shall not remove information needed for access or shall restore it upon delivery.</p>	<p>Supported:</p> <p>This product complies with TTY Standards (TSB-121). To confirm TTY signal compatibility, This product is tested with standard TTY devices during the development phase of the handset.</p> <p>*TSB-121:</p> <p>Cellular Subscriber Unit</p>	

	Interface for TDD (2001) - This TIA standard was developed by committee TR-45.1	
(k)(1) Products which have mechanically operated controls or keys shall comply with the following: Controls and Keys shall be tactilely discernible without activating the controls or keys.	Supported: The keys and buttons on this product provide a good tactile feedback of clicking keys / buttons (i.e. definitive "click" feeling).	
(k)(2) Products which have mechanically operated controls or keys shall comply with the following: Controls and Keys shall be operable with one hand and shall not require tight grasping, pinching, twisting of the wrist. The force required to activate controls and keys shall be 5 lbs. (22.2N) maximum.	Supported: Users can operate any key on this product with one hand. They need not operate tight grasping, pinching, twisting of the wrist.	
(k)(3) Products which have mechanically operated controls or keys shall comply with the following: If key repeat is supported, the delay before repeat shall be adjustable to at least 2 seconds. Key repeat rate shall be adjustable to 2 seconds per character.	Not Applicable: This product does not equip a keyboard. Therefore, key repeat is not supported.	
(k)(4) Products which have mechanically operated controls or keys shall comply with the following: The status of all locking or toggle controls or keys shall be visually discernible, and discernible either through touch or sound.	Supported: For all keys, the status of all locking and toggle controls is not applicable. All keys are visually discernible and discernible through touch (click).

Section 1194.24 Video and Multi-media

Products – Detail

VPAT™

Voluntary Product Accessibility Template®

<i>Criteria</i>	<i>Supporting Features</i>	<i>Remarks and explanations</i>
<p>a) All analog television displays 13 inches and larger, and computer equipment that includes analog television receiver or display circuitry, shall be equipped with caption decoder circuitry which appropriately receives, decodes, and displays closed captions from broadcast, cable, videotape, and DVD signals. As soon as practicable, but not later than July 1, 2002, widescreen digital television (DTV) displays measuring at least 7.8 inches vertically, DTV sets with conventional displays measuring at least 13 inches vertically, and stand-alone DTV tuners, whether or not they are marketed with display screens, and computer equipment that includes DTV receiver or display circuitry, shall be equipped with caption decoder circuitry which appropriately receives,</p>	<p>Not Applicable:</p> <p>This product is a portable device. It does not have 13 inches display.</p>	

decodes, and displays closed captions from broadcast, cable, videotape, and DVD signals.		
(b) Television tuners, including tuner cards for use in computers, shall be equipped with secondary audio program playback circuitry.	Not Applicable: This product is a portable device. It does not have television tuners.	
(c) All training and informational video and multimedia productions which support the agency's mission, regardless of format, that contain speech or other audio information necessary for the comprehension of the content, shall be open or closed captioned.	Supported: This product supports closed caption feature according to §79.103 Closed caption decoder requirements for apparatus.	
(d) All training and informational video and multimedia productions which support the agency's mission, regardless of format, that contain visual information necessary for the comprehension of the content, shall be audio described.	Not Supported: This product does not support "audio described".	
(e) Display or presentation of alternate text presentation or audio descriptions shall be user-selectable unless permanent.	Not Supported: This product does not support "audio described".

**Section 1194.25 Self-Contained, Closed
Products – Detail**

VPAT™

Voluntary Product Accessibility Template®

Criteria	Supporting Features	Remarks and explanations
(a) Self contained products shall be usable by people with disabilities without requiring an end-user to attach Assistive Technology to the product. Personal headsets for private listening are not Assistive Technology.	Supported: This product implements Assistive Technology internally.	
(b) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	Supported: This product displays count down for Visibility timeout of Bluetooth.	
(c) Where a product utilizes touchscreens or contact-sensitive controls, an input method shall be provided that complies with §1194.23 (k) (1) through (4).	Supported: Please refer to §1194.23 (k) (1) through (4).	
(d) When biometric forms of user identification or control are used, an alternative form of identification or activation, which does not require the user to possess particular biological characteristics, shall also be provided.	Supported: This product has some methods for unlocking screen except for face unlock.	

<p>(e) When products provide auditory output, the audio signal shall be provided at a standard signal level through an industry standard connector that will allow for private listening. The product must provide the ability to interrupt, pause, and restart the audio at anytime.</p>	<p>Supported:</p> <p>This product supports 3.5 mm stereo headset that will allow for private listening.</p>	
<p>(f) When products deliver voice output in a public area, incremental volume control shall be provided with output amplification up to a level of at least 65 dB. Where the ambient noise level of the environment is above 45 dB, a volume gain of at least 20 dB above the ambient level shall be user selectable. A function shall be provided to automatically reset the volume to the default level after every use.</p>	<p>Not Supported:</p> <p>This product does not support this feature. This product keeps the volume level after every use. It keeps the latest adjusted volume level.</p>	
<p>(g) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.</p>	<p>Supported:</p> <p>This product uses not only color coding but also text prompt, sound prompt.</p>	
<p>(h) When a product permits a user to adjust color and contrast settings, a range of color selections capable of producing a variety of contrast levels shall be provided.</p>	<p>Partially Supported:</p> <p>Color adjustment is supported. However, contrast settings is not supported.</p>	

<p>(i) Products shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.</p>	<p>Supported:</p> <p>This handset avoids the frequencies between 2Hz and 55Hz in order to avoid LED Lighting flicker.</p>	
<p>(j) (1) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: The position of any operable control shall be determined with respect to a vertical plane, which is 48 inches in length, centered on the operable control, and at the maximum protrusion of the product within the 48 inch length on products which are freestanding, non-portable, and intended to be used in one location and which have operable controls.</p>	<p>Not Applicable:</p> <p>This product is a portable device.</p>	
<p>(j)(2) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Where any operable control is 10 inches or less behind the reference plane, the height shall be 54 inches maximum and 15 inches minimum above the floor.</p>	<p>Not Applicable:</p> <p>This product is a portable device.</p>	
<p>(j)(3) Products which are freestanding, non-portable, and intended to</p>	<p>Not Applicable:</p> <p>This product is a portable</p>	

<p>be used in one location and which have operable controls shall comply with the following: Where any operable control is more than 10 inches and not more than 24 inches behind the reference plane, the height shall be 46 inches maximum and 15 inches minimum above the floor.</p>	<p>device.</p>	
<p>(j)(4) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Operable controls shall not be more than 24 inches behind the reference plane.</p>	<p>Not Applicable: This product is a portable device.</p>
